

Table of Contents

DOMAIN I

LANGUAGE ARTS AND READING 1

COMPETENCY 1

KNOWLEDGE OF THE READING PROCESS 5

Skill 1.1: Identify the processes, skills, and phases of word recognition that lead to effective decoding (e.g., pre-alphabetic, partial-alphabetic, full alphabetic, graphophonemic, morphemic) 5

Skill 1.2: Identify instructional methods for promoting the development of decoding and encoding skills 10

Skill 1.3: Identify the components of reading fluency (e.g., accuracy, automaticity, rate, prosody) 11

Skill 1.4: Identify instructional methods (e.g., practice with high frequency words, timed readings) **for developing reading fluency** 17

Skill 1.5: Identify instructional methods and strategies for increasing vocabulary acquisition (e.g., word analysis, choice of words, context clues, multiple exposures) **across the content areas** 19

Skill 1.6: Identify instructional methods and strategies (e.g., summarizing, self-monitoring, questioning, use of graphic and semantic organizers, think alouds, recognizing story structure) **for facilitating reading comprehension** 23

Skill 1.7: Identify essential comprehension skills (e.g., main idea, supporting details and facts, author's purpose, fact and opinion, point of view, inference, conclusion) 27

Skill 1.8: Identify appropriate uses of multiple representations of information (e.g., charts, tables, graphs, pictures, print and nonprint media) **for a variety of purposes** 33

Skill 1.9: Identify strategies (e.g., making connections and predictions, questioning, summarizing, question generating) **for developing critical thinking skills such as analysis, synthesis, and evaluation** 34

Skill 1.10: Identify instructional methods for teaching a variety of informational and literacy text structures 37

Skill 1.11: Identify the content of emergent literacy (e.g., oral language development, phonological awareness, alphabet knowledge, decoding, concepts of print, motivation, text structures, written language development) 38

COMPETENCY 2

KNOWLEDGE OF LITERACY AND LITERARY ANALYSIS 46

Skill 2.1: Identify characteristics and elements of a variety of literary genres (e.g., realistic fiction, fantasy, poetry, nonfiction) 46

Skill 2.2: Identify terminology and appropriate use of literary devices 49

Skill 2.3: Identify and apply professional guidelines for selecting multicultural literature 53

Skill 2.4: Identify appropriate techniques for encouraging students to respond to literature in a variety of ways 54

COMPETENCY 3

KNOWLEDGE OF THE WRITING PROCESS AND ITS APPLICATIONS	55
Skill 3.1: Demonstrate knowledge of the developmental stages of writing	55
Skill 3.2: Demonstrate knowledge of the writing process (<i>e.g., prewriting, drafting, revising, editing, publishing</i>)	58
Skill 3.3: Identify characteristics of the modes of writing (<i>e.g., narrative, descriptive, expository, persuasive, informative, creative</i>).....	59
Skill 3.4: Select the appropriate mode of writing for a variety of occasions, purposes, and audiences	61
Skill 3.5: Identify elements and appropriate use of rubrics to assess writing	61
Skill 3.6: Demonstrate knowledge of writing conventions (<i>e.g., spelling, punctuation, capitalization, syntax, word usage</i>).....	63
Skill 3.7: Identify instructional methods for teaching writing conventions	74

COMPETENCY 4

KNOWLEDGE OF READING METHODS AND ASSESSMENTS	75
Skill 4.1: Identify measurement concepts, characteristics, and uses of norm-referenced, criterion-referenced, and performance-based assessments	75
Skill 4.2: Identify oral and written methods for assessing student progress (<i>e.g., informal reading inventories, fluency checks, rubrics, running records, story retelling, portfolios</i>)	78
Skill 4.3: Interpret assessment data (<i>e.g., screening, progress monitoring, diagnostic</i>) to guide instructional decisions	82
Skill 4.4: Use individual student reading data to differentiate instruction	84
Skill 4.5: Interpret students' formal and informal assessment results to inform students and parents or guardians	85
Skill 4.6: Evaluate the appropriateness (<i>e.g., curriculum alignment, freedom from bias</i>) of assessment instruments and practices	87
Skill 4.7: Identify appropriate classroom organizational formats (<i>e.g., literature circles, small groups, individuals, workshops, reading centers, multiage groups</i>) for specific instructional objectives	88
Skill 4.8: Identify instructional methods for developing emergent literacy	90
Skill 4.9: Identify methods for the diagnosis, prevention, and intervention of common emergent difficulties	90

COMPETENCY 5

KNOWLEDGE OF COMMUNICATION	93
Skill 5.1: Demonstrate knowledge of penmanship (<i>e.g., legibility, proper slant, spacing</i>).....	93
Skill 5.2: Demonstrate knowledge of listening and speaking strategies (<i>e.g., questioning, paraphrasing, eye contact, voice, genres</i>).....	94
Skill 5.3: Identify instructional methods for developing listening and speaking skills	97

COMPETENCY 6

KNOWLEDGE OF INFORMATION AND MEDIA LITERACY	100
Skill 6.1: Demonstrate knowledge of a wide array of informational and media literacy (<i>e.g., Internet, printed material, artifacts, visual media, primary sources</i>).....	100
Skill 6.2: Demonstrate knowledge of systematic and critical processes for collecting and presenting authentic information	101
Skill 6.3: Identify current technology available for use in educational settings (<i>e.g., computer software and hardware, Web tools</i>)	102

DOMAIN II

SOCIAL SCIENCE 103

COMPETENCY 7

KNOWLEDGE OF TIME, CONTINUITY, AND CHANGE (I.E., HISTORY)..... 107

Skill 7.1: Identify historical events that are related by cause and effect..... 107

Skill 7.2: Evaluate examples of primary source documents for historical perspectives..... 108

Skill 7.3: Identify cultural contributions and technological developments of Africa; the Americas; Asia, including the Middle East; and Europe 109

Skill 7.4: Relate physical and human geographic factors to major historical events and movements..... 114

Skill 7.5: Identify significant historical factors and events that have influenced Eastern and Western civilizations..... 116

Skill 7.6: Identify the causes and consequences of exploration, settlement, and growth..... 120

Skill 7.7: Identify individuals and events that have influenced economic, social, and political institutions in the United States..... 126

Skill 7.8: Identify immigration and settlement patterns that have shaped the history of the United States 129

Skill 7.9: Identify how various cultures contributed to the unique social, cultural, economic, and political features of Florida 132

COMPETENCY 8

KNOWLEDGE OF PEOPLE, PLACES, AND ENVIRONMENT (I.E., GEOGRAPHY)..... 139

Skill 8.1: Identify the six essential elements of geography (*i.e., the world in spatial terms, places and regions, physical systems, human systems, environment and society, uses of geography*), including the specific terms for each element 139

Skill 8.2: Interpret maps and other graphic representations, and identify tools and technologies to acquire, process, and report information from a spatial perspective 141

Skill 8.3: Interpret statistics that show how places differ in their human and physical characteristics..... 145

Skill 8.4: Identify ways in which people adapt to an environment through the production and use of clothing, food, and shelter 146

Skill 8.5: Identify how tools and technological advances affect the environment 147

Skill 8.6: Identify physical, cultural, economic, and political reasons for the movement of people in the world, nation, or state 148

Skill 8.7: Identify how transportation and communication networks contribute to the level of economic development in different regions..... 149

Skill 8.8: Compare and contrast major regions of the world 151

COMPETENCY 9

KNOWLEDGE OF GOVERNMENT AND THE CITIZEN (I.E., GOVERNMENT AND CIVICS) 153

Skill 9.1: Identify the structure, functions, and purposes of government..... 153

Skill 9.2: Demonstrate knowledge of the rights and responsibilities of a citizen in the world, nation, state, and community..... 154

Skill 9.3: Identify major concepts of the U.S. Constitution and other historical documents 155

Skill 9.4: Identify how the legislative, executive, and judicial branches share powers and responsibility. 158

Skill 9.5: Demonstrate knowledge of the U.S. electoral system and the election process 160

Skill 9.6: Identify the structures and functions of U.S. federal, state, and local governments..... 161

Skill 9.7: Identify the relationships between social, economic, and political rights and the historical documents that secure these rights 163

Skill 9.8: Demonstrate knowledge of the processes of the U.S. legal system 169

Skill 9.9: Identify the roles of the United States in international relations 171

COMPETENCY 10

KNOWLEDGE OF PRODUCTION, DISTRIBUTION, AND CONSUMPTION (I.E., ECONOMICS) 173

Skill 10.1: Identify ways that limited resources affect the choices made by governments and individuals 173

Skill 10.2: Compare and contrast the characteristics of different economic institutions (*e.g., banks, credit unions, stock markets, the Federal Reserve*) 174

Skill 10.3: Identify the role of markets from production through distribution to consumption 175

Skill 10.4: Identify factors to consider when making consumer decisions 177

Skill 10.5: Identify the economic interdependence between nations (*e.g., trade, finance, movement of labor*) 178

Skill 10.6: Identify human, natural, and capital resources and how these resources are used in the production of goods and services 180

COMPETENCY 11

KNOWLEDGE OF INSTRUCTION AND ASSESSMENT OF SOCIAL SCIENCES 181

Skill 11.1: Identify appropriate resources for teaching social science concepts 181

Skill 11.2: Identify appropriate assessment methods in teaching social science concepts 182

DOMAIN III

MUSIC, VISUAL ARTS, PHYSICAL EDUCATION, AND HEALTH 185

COMPETENCY 12

KNOWLEDGE OF SKILLS AND TECHNIQUES IN MUSIC AND VISUAL ARTS 189

Skill 12.1: Identify appropriate varieties of music (*e.g., age-appropriate range and vocal ability; diverse cultures, genres, and styles*) 189

Skill 12.2: Identify developmentally appropriate singing techniques (*e.g., posture, breath support, tone quality, vocal range*) 189

Skill 12.3: Identify correct performance techniques for rhythmic and melodic classroom instruments (*e.g., nonpitched percussion, recorder, autoharp, keyboard*) 190

Skill 12.4: Read and interpret simple, traditional, and nontraditional music notation (*e.g., melodic, rhythmic, harmonic*) 191

Skill 12.5: Select safe and developmentally appropriate media, techniques, and tools to create both two-dimensional and three-dimensional works of art 192

Skill 12.6: Identify appropriate uses of art materials and tools for developing basic processes and motor skills 193

COMPETENCY 13

KNOWLEDGE OF CREATION AND COMMUNICATION IN MUSIC AND VISUAL ARTS..... 194

Skill 13.1: Identify the elements of music (e.g., rhythm, melody, form, texture, timbre, dynamics) and ways they are used to express text, ideas, emotions, settings, time, and place 194

Skill 13.2: Demonstrate knowledge of strategies for developing creative responses through music to ideas drawn from text, speech, movement, and visual images 196

Skill 13.3: Demonstrate knowledge of strategies for developing creative responses through art to ideas drawn from text, music, speech, movement, and visual images 196

Skill 13.4: Identify the elements of art and principles of design (e.g., line, color, shape, form, texture, balance, movement) and ways they are used to express text, ideas, meanings, and emotions 198

COMPETENCY 14

KNOWLEDGE OF CULTURAL AND HISTORICAL CONNECTIONS IN MUSIC AND VISUAL ARTS 199

Skill 14.1: Identify characteristics of style in musical selections 199

Skill 14.2: Demonstrate knowledge of how music reflects particular cultures, historical periods, and places 201

Skill 14.3: Identify characteristics of style in works of art 202

Skill 14.4: Demonstrate knowledge of how visual arts reflect particular cultures, historical periods, and places 203

COMPETENCY 15

KNOWLEDGE OF AESTHETIC AND CRITICAL ANALYSIS OF MUSIC AND VISUAL ARTS 204

Skill 15.1: Identify strategies for developing students' analytical skills to evaluate musical performance 204

Skill 15.2: Identify strategies for developing students' analytical skills to evaluate works of art 205

COMPETENCY 16

KNOWLEDGE OF APPROPRIATE ASSESSMENT STRATEGIES IN MUSIC AND VISUAL ARTS 206

Skill 16.1: Identify a variety of developmentally appropriate strategies and materials for assessing skills, techniques, creativity, and communication in music 206

Skill 16.2: Identify a variety of developmentally appropriate strategies and materials for assessing skills, techniques, creativity, and communication in visual arts 207

COMPETENCY 17

KNOWLEDGE OF PERSONAL HEALTH AND WELLNESS 208

Skill 17.1: Demonstrate knowledge of the interrelatedness of physical activity, fitness, and health 208

Skill 17.2: Demonstrate basic knowledge of nutrition and its role in promoting health 209

Skill 17.3: Identify the processes of decision making and goal setting in promoting individual health and wellness 210

Skill 17.4: Demonstrate knowledge of common health problems and risk behaviors associated with them 211

COMPETENCY 18

KNOWLEDGE OF PHYSICAL, SOCIAL, AND EMOTIONAL GROWTH AND DEVELOPMENT 214

Skill 18.1: Identify the principles of sequential progression of motor skill development 214

Skill 18.2: Demonstrate knowledge of human growth and development and its relationship to physical, social, and emotional well-being 215

Skill 18.3: Identify major factors associated with social and emotional health (*e.g., communication skills, self-concept, fair play, conflict resolution, character development, stress management*) 217

Skill 18.4: Identify problems associated with physical, social, and emotional health 220

Skill 18.5: Identify factors related to responsible sexual behavior 221

COMPETENCY 19

KNOWLEDGE OF COMMUNITY HEALTH AND SAFETY ISSUES 222

Skill 19.1: Identify factors contributing to substance use and abuse and identify signs, symptoms, effects, and strategies for the prevention of substance abuse 222

Skill 19.2: Demonstrate knowledge of resources from home, school, and community that provide valid health information, products, and services 223

Skill 19.3: Identify appropriate violence prevention strategies in the home, school, and community 224

Skill 19.4: Identify appropriate injury prevention and safety strategies in the home, school, and community 225

COMPETENCY 20

KNOWLEDGE OF SUBJECT CONTENT AND APPROPRIATE CURRICULUM DESIGN 227

Skill 20.1: Distinguish between developmentally appropriate and inappropriate instructional practices that consider the interaction of cognitive, affective, and psychomotor domains 227

Skill 20.2: Identify various factors (*e.g., environment, equipment, facilities, space, safety, group diversity*) **to consider when planning physical activities** 230

Skill 20.3: Analyze the influence of culture, media, technology, and other factors when planning health and wellness instruction 231

DOMAIN IV

SCIENCE AND TECHNOLOGY 233

COMPETENCY 21

KNOWLEDGE OF THE NATURE OF MATTER 237

Skill 21.1: Identify the fundamental physical properties of matter (*e.g., mass, volume*) 237

Skill 21.2: Compare physical and chemical changes (*e.g., cutting, burning, rusting*) 238

Skill 21.3: Compare the characteristics of elements, compounds, and mixtures 239

Skill 21.4: Compare the physical properties of solids, liquids, and gases (*e.g., mass, volume, color, texture, hardness, temperature*) 241

Skill 21.5: Compare the properties of liquids during phase change through heating and cooling (*e.g., boiling, melting, freezing, evaporation, condensation*) 243

Skill 21.6: Demonstrate knowledge that all matter is composed of parts too small to be seen (*e.g., electrons, protons, neutrons*) 243

COMPETENCY 22

KNOWLEDGE OF FORCES, MOTION, AND ENERGY	245
Skill 22.1: Demonstrate knowledge of temperature, heat, and heat transfer	245
Skill 22.2: Identify the types and characteristics of contact forces (<i>e.g., pushes and pulls, friction</i>) and at-a-distance forces (<i>e.g., magnetic, gravitational, electrostatic</i>).....	247
Skill 22.3: Apply knowledge of light and optics to practical applications (<i>i.e., reflection, refraction, diffusion</i>)	249
Skill 22.4: Apply knowledge of electrical currents, circuits, conductors, insulators, and static electricity to real-world situations	250
Skill 22.5: Distinguish between different types of energy (<i>e.g., chemical, electrical, mechanical, electromagnetic, heat, light, sound, solar</i>) and their characteristics as they apply to real-world situations	251
Skill 22.6: Apply knowledge of the ability of energy to cause motion or create change	252
Skill 22.7: Demonstrate knowledge that electrical energy can be transformed into heat, light, mechanical, and sound energy	253
Skill 22.8: Demonstrate knowledge of potential and kinetic energy	253
Skill 22.9: Demonstrate knowledge that motion of all matter can be changed by forces, observed, described, and measured	254
Skill 22.10: Differentiate between balanced and unbalanced forces and how they affect objects	254

COMPETENCY 23

KNOWLEDGE OF EARTH AND SPACE	255
Skill 23.1: Identify characteristics of geologic formations (<i>e.g., volcanoes, canyons, mountains</i>) and the mechanisms by which they are changed (<i>e.g., physical and chemical weathering, erosion, plate tectonics</i>)	255
Skill 23.2: Identify the characteristics of soil and the process of soil formation	260
Skill 23.3: Identify the major groups and properties of rocks and minerals, examples of each, and the processes of their formation	261
Skill 23.4: Identify ways in which land, air, and water interact (<i>e.g., soil absorption, runoff, water cycle, atmospheric conditions, weather patterns</i>).....	262
Skill 23.5: Differentiate between radiation, conduction, and convection, the three mechanisms by which heat is transferred through Earth's system	267
Skill 23.6: Identify the components of Earth's solar system and compare their individual characteristics	268
Skill 23.7: Demonstrate knowledge of Earth's place in our changing universe (<i>e.g., history and purposes of space exploration, vastness of space</i>).....	271
Skill 23.8: Demonstrate knowledge of the phases of the Moon and the Moon's effect on Earth	272
Skill 23.9: Identify Earth's tilt and orbital pattern and how they determine the seasons	274
Skill 23.10: Analyze various conservation methods and their effectiveness in relation to renewable and non-renewable natural resources	275
Skill 23.11: Identify the Sun as a star and its effect on Earth (<i>e.g., radiant energy, heat, light</i>)	278

COMPETENCY 24

KNOWLEDGE OF LIFE SCIENCE	279
Skill 24.1: Compare and contrast living and nonliving things	279
Skill 24.2: Distinguish between infectious agents (<i>e.g., viruses, bacteria, fungi, parasites</i>) and their effects on the human body	280
Skill 24.3: Differentiate structures and functions of plant and animal cells	283

Skill 24.4: Identify the major steps of plants’ physiological processes of photosynthesis, transpiration, reproduction, and respiration..... 284

Skill 24.5: Demonstrate knowledge of how plants respond to stimuli (*e.g., heat, light, gravity*)..... 285

Skill 24.6: Identify the structures and functions of organs and systems of both animals and humans..... 286

Skill 24.7: Demonstrate knowledge of animals’ physiological processes (*e.g., respiration, reproduction, digestion, circulation*)..... 293

Skill 24.8: Demonstrate knowledge of cell theory as the fundamental organizing principle of life on Earth..... 294

Skill 24.9: Demonstrate knowledge of heredity, evolution, and natural selection 296

Skill 24.10: Demonstrate knowledge of the interdependence of living things with each other and with their environment (*e.g., food webs, pollution, hurricanes*) 298

COMPETENCY 25

KNOWLEDGE OF THE NATURE OF SCIENCE..... 300

Skill 25.1: Demonstrate knowledge of basic science processes (*e.g., observing, classifying, communicating, qualifying, inferring, predicting*) 300

Skill 25.2: Apply knowledge of scientific inquiry (*e.g., forming hypotheses, manipulating variables, recording and interpreting data*) **to learning science concepts** 301

Skill 25.3: Identify the appropriate laboratory equipment for specific activities 302

Skill 25.4: Identify state safety procedures for teaching science, including the care of living organisms and the accepted procedures for the safe preparation, use, storage, and disposal of chemicals and other materials 304

Skill 25.5: Demonstrate knowledge of basic scientific vocabulary (*e.g., theory, law, hypotheses, models*)..... 307

COMPETENCY 26

KNOWLEDGE OF THE RELATIONSHIP OF SCIENCE AND TECHNOLOGY 308

Skill 26.1: Identify the interrelationship of science and technology 308

Skill 26.2: Identify the tools and techniques of science and technology used for data collection and problem solving 309

Skill 26.3: Identify ways in which technology can be used by students to represent understanding of science concepts 310

COMPETENCY 27

KNOWLEDGE OF INSTRUCTION AND ASSESSMENT..... 311

Skill 27.1: Identify a variety of appropriate instructional strategies (*e.g., cooperative learning, inquiry learning, investigations*) **for teaching specific topics**..... 311

Skill 27.2: Select manipulatives, physical models, and other classroom teaching tools for teaching specific topics 311

Skill 27.3: Identify a variety of methods for assessing scientific knowledge, including analyzing student thinking processes to determine strengths and weaknesses 311

DOMAIN V

MATHEMATICS 313

COMPETENCY 28

KNOWLEDGE OF NUMBERS AND OPERATIONS 317

Skill 28.1: Associate multiple representations of numbers using word names, standard numerals, and pictorial models for real numbers (e.g., whole numbers, decimals, fractions, integers).....	317
Skill 28.2: Compare the relative size of integers, fractions, decimals, numbers expressed as percents, and numbers with exponents.....	317
Skill 28.3: Apply ratios, proportions, and percents in real-world situations	318
Skill 28.4: Represent numbers in a variety of equivalent forms, including whole numbers, integers, fractions, decimals, percents, and exponents.....	319
Skill 28.5: Perform operations on rational numbers (e.g., whole numbers, fractions, decimals, integers) using multiple representations and algorithms and understand the relationships between these operations (i.e., addition, subtraction, multiplication, and division).....	325
Skill 28.6: Select the appropriate operation(s) to solve problems involving ratios and percents and the addition, subtraction, multiplication, and division of rational numbers.....	331
Skill 28.7: Use estimation in problem-solving situations	333
Skill 28.8: Apply number theory concepts (e.g., primes, composites, multiples, factors, number sequences, number properties, rules of divisibility).....	333
Skill 28.9: Apply the order of operations.....	338

COMPETENCY 29

KNOWLEDGE OF GEOMETRY AND MEASUREMENT 339

Skill 29.1: Analyze properties of two-dimensional shapes (e.g., area, sides, angles)	339
Skill 29.2: Apply geometric properties and relationships to solve problems (e.g., circumference, perimeter, area, volume) using appropriate strategies and formulas.....	341
Skill 29.3: Apply the geometric concepts of symmetry, congruency, similarity, and transformations	343
Skill 29.4: Identify and locate ordered pairs in a rectangular coordinate system	352
Skill 29.5: Analyze properties of three-dimensional shapes (e.g., volume, faces, edges, vertices).....	353
Skill 29.6: Compose and decompose two-dimensional and three-dimensional geometric shapes.....	353
Skill 29.7: Determine how a change in length, width, height, or radius affects perimeter, circumference, area, surface area, or volume	356
Skill 29.8: Within a given system (i.e., metric or customary), solve real-world problems involving measurement with both direct and indirect measures and make conversions to a larger or smaller unit	356
Skill 29.9: Solve real-world problems involving estimates and exact measurements.....	357
Skill 29.10: Select appropriate measurement units to solve problems	357
Skill 29.11: Identify three-dimensional objects from two-dimensional representations of objects and vice versa	359

COMPETENCY 30

KNOWLEDGE OF ALGEBRA	359
Skill 30.1: Extend and generalize patterns or functional relationships	359
Skill 30.2: Interpret, compare, and translate multiple representations of patterns and relationships by using tables, graphs, equations, expressions, and verbal descriptions	361
Skill 30.3: Select a representation of an algebraic expression, equation, or inequality that applies to a real-world situation	362
Skill 30.4: Demonstrate knowledge of one- and two-step linear equations and inequalities	364
Skill 30.5: Apply the commutative, associative, and distributive properties to show that two expressions are equivalent	369

COMPETENCY 31

KNOWLEDGE OF DATA ANALYSIS	371
Skill 31.1: Demonstrate knowledge of the concepts of variability (i.e., range) and central tendency (i.e., mean, median, mode)	371
Skill 31.2: Use data to construct and analyze frequency tables and graphs (e.g., bar graphs, pictographs, line graphs)	372
Skill 31.3: Make accurate predictions and draw conclusions from data	375

COMPETENCY 32

KNOWLEDGE OF INSTRUCTION AND ASSESSMENT	376
Skill 32.1: Identify a variety of appropriate instructional strategies (e.g., cooperative learning, peer tutoring, think alouds) for teaching specific concepts	376
Skill 32.2: Identify ways that manipulatives, mathematical and physical models, and technology can be used in instruction	377
Skill 32.3: Identify a variety of methods for assessing mathematical knowledge, including analyzing student thinking processes to determine strengths and weaknesses	379

SAMPLE TEST

Sample Test	383
Answer Key	388
