

Table of Contents

DOMAIN I	
READING	1
COMPETENCY 1	
LITERAL COMPREHENSION	3
Skill 1.1: Identify summaries or paraphrases of the main idea or primary purpose of a reading selection	3
Skill 1.2: Identify summaries or paraphrases of supporting ideas	4
Skill 1.3: Recognize how a reading selection is organized	4
Skill 1.4: Recognize how the ideas in a selection are related to one another	6
Skill 1.5: Recognize how key phrases and transition words are used in a reading selection	7
Skill 1.6: Identify the meanings of words as they are used in the context of a reading selection	9
COMPETENCY 2	
CRITICAL AND INFERENTIAL COMPREHENSION	13
Skill 2.1: Determine the strengths and weaknesses of arguments in a reading selection	13
Skill 2.2: Determine the relevance of evidence presented in the reading selection to the assertions made in the selection	14
Skill 2.3: Judge if material presented is fact or opinion	15
Skill 2.4: Draw inferences and implications from the directly stated content of a reading selection	17
Skill 2.5: Determine the author's attitude toward the material discussed	18
Skill 2.6: Draw conclusions about the material in a selection	19

DOMAIN II

WRITING 41

COMPETENCY 3

GRAMMATICAL RELATIONSHIPS 43

Skill 3.1: Identify errors in use of adjectives and adverbs 43

Skill 3.2: Identify errors in use of nouns 45

Skill 3.3: Identify errors in use of pronouns 48

Skill 3.4: Identify errors in use of verbs 52

COMPETENCY 4

STRUCTURAL RELATIONSHIPS 59

Skill 4.1: Identify errors in use of comparison 61

Skill 4.2: Identify errors in use of correlation 64

Skill 4.3: Identify errors in use of negation 71

Skill 4.4: Identify errors in use of parallelism 73

Skill 4.5: Identify errors in use of coordination and subordination 77

COMPETENCY 5

IDIOMS, WORD CHOICE, AND MECHANICS 82

Skill 5.1: Identify errors in use of idiomatic expressions 82

Skill 5.2: Identify errors in word choice 85

Skill 5.3: Identify errors in use of capitalization 100

Skill 5.4: Identify errors in use of punctuation 104

COMPETENCY 6

ESSAY 116

Skill 6.1: Write an essay that is appropriate for the assigned task and for the intended audience 116

Skill 6.2: Organize and develop ideas logically, making clear connections between them 119

Skill 6.3: Provide and sustain a clear focus or thesis 123

Skill 6.4: Use supporting reasons, examples, and details to clearly and logically develop the ideas presented in the essay 125

Skill 6.5: Demonstrate facility in the use of language and the ability to use a variety of sentence structures 130

Skill 6.6: Construct effective sentences that are generally free of errors in standard written English 130

DOMAIN III

MATHEMATICS 153

COMPETENCY 7

NUMBER AND OPERATIONS 157

Skill 7.1: Demonstrate an understanding of order among integers, fractions, and decimals	157
Skill 7.2: Demonstrate an understanding that a number can be represented in more than one way	158
Skill 7.3: Demonstrate an understanding of place value, how numbers are named, and order of magnitude of numbers	162
Skill 7.4: Demonstrate an understanding of the properties of whole numbers without necessarily knowing the names of the properties	163
Skill 7.5: Demonstrate an understanding of the properties (<i>commutative, associative, and distributive</i>) of the basic operations of addition, subtraction, multiplication, and division and recognize equivalent computational procedures	164
Skill 7.6: Perform computations; adjust the result of a computation to fit the context of a problem; and identify numbers, information, or operations needed to solve a problem	167
Skill 7.7: Estimate the result of a calculation and determine the reasonableness of an estimate	178
Skill 7.8: Solve problems involving ratio, proportion, and percent	179
Skill 7.9: Logical connectives and quantifiers: interpret statements that use logical connectives (<i>and, if-then</i>) as well as quantifiers (<i>some, all, none</i>)	183
Skill 7.10: Validity of arguments: use deductive reasoning to determine whether an argument (<i>a series of statements leading to a conclusion</i>) is valid or invalid	188

COMPETENCY 8

ALGEBRA 192

Skill 8.1: Solve simple equations and inequalities and predict the outcome of changing some number or condition in a problem	192
Skill 8.2: Demonstrate an understanding of the algorithmic point of view; recognize various ways to solve a problem; and identify, complete or analyze a procedure	198
Skill 8.3: Discover patterns in a procedure; identify and recognize patterns in data; and demonstrate and understanding of variations without necessarily knowing the correct term for the relationship	200
Skill 8.4: Explore relationships between verbal or symbolic expressions and graphs and use symbolic algebra to solve problems	201
Skill 8.5: Logical connectives and quantifiers: interpret statements that use logical connectives (<i>and, if-then</i>) as well as quantifiers (<i>some, all, none</i>)	203
Skill 8.6: Validity of arguments: use deductive reasoning to determine whether an argument (<i>a series of statements leading to a conclusion</i>) is valid or invalid	203

COMPETENCY 9

GEOMETRY AND MEASUREMENT 203

Skill 9.1: Understand and apply the characteristics and properties of two-dimensional geometric shapes	203
Skill 9.2: Use geometric relationships such as the Pythagorean relationship, congruence, and similarity	214
Skill 9.3: Apply transformations or use symmetry to analyze mathematical situations	221
Skill 9.4: Use coordinate geometry to represent geometric concepts	224

Skill 9.5: Logical connectives and quantifiers: interpret statements that use logical connectives (*and, if-then*) as well as quantifiers (*some, all, none*) 225

Skill 9.6: Validity of arguments: use deductive reasoning to determine whether an argument (*a series of statements leading to a conclusion*) is valid or invalid 225

Skill 9.7: Demonstrate basic literacy in both the U.S. customary and metric systems of measurement 226

Skill 9.8: Convert from one unit to another within the same system and between different systems 229

Skill 9.9: Recognize and use appropriate units of measure and read a graduated scale 230

Skill 9.10: Determine the measurements needed to solve a problem..... 231

Skill 9.11: Recognize and use geometric concepts in making linear, area, and volume measurements..... 231

Skill 9.12: Solve measurement problems by using a formula, estimating, employing indirect measurement, using rates as measures, making visual comparisons, using scaling or proportional reasoning, or using a nonstandard unit 231

COMPETENCY 10

DATA ANALYSIS AND PROBABILITY 232

Skill 10.1: Read and interpret visual displays of quantitative information, such as bar graphs, line graphs, pie charts, pictographs, tables, stem-and-leaf plots, scatter plots, schedules, and Venn and other diagrams 232

Skill 10.2: Understand the correspondence between data sets and their graphic representations..... 236

Skill 10.3: Make observations, comparisons, and predictions or extrapolations from a given data display and draw conclusions or make inferences from a given data display 240

Skill 10.4: Determine mean, median, mode(s), and range 241

Skill 10.5: Interpret numbers used to express simple probability 244

Skill 10.6: Assign a probability to a possible outcome 244
