

Table of Contents

	Pg.
Part I: Content Domains for Subject Matter Understanding and Skill in Earth and Planetary Science	
Competency 1.0 Understand galaxies and stars	1
Competency 2.0 Understand solar systems	9
Competency 3.0 Understand planets and satellites.....	13
Competency 4.0 Understand tectonic processes.....	18
Competency 5.0 Understand oceans.....	26
Competency 6.0 Understand the atmosphere	34
Competency 7.0 Understand Earth's energy budget including inflow and outflow	38
Competency 8.0 Understand circulation in the oceans and atmosphere	43
Competency 9.0 Understand climate variations in time and space.....	49
Competency 10.0 Understand the rock cycle	52
Competency 11.0 Understand the water, carbon, and nitrogen cycles.....	56
Competency 12.0 Understand tectonic evolution.....	63
Competency 13.0 Identify major economic Earth resources.....	66
Competency 14.0 Explain surface processes	70
Competency 15.0 Understand natural hazards.....	76
Competency 16.0 Understand geologic mapping	78

**Part II: Subject Matter Skills and Abilities Applicable to the Content
Domains in Science**

Domain 1. Investigation and Experimentation.....	81
Domain 2. Nature of Science	96
Domain 3. Science and Society	104
Sample Test.....	113
Answer Key	124
Rationales with Sample Questions	125
