

TABLE OF CONTENTS

Competency/Skill #	Page #
COMPETENCY 1.0 HUMAN DEVELOPMENT	1
SKILL 1.1 Stages and characteristics of physical development during infancy, childhood, adolescence, and adulthood	1
SKILL 1.2 Understand the stages of motor development. Includes . stages and characteristics of motor development during infancy, childhood, adolescence, and adulthood.....	1
SKILL 1.3 Understand cognitive, social, and emotional development. Includes stages and characteristics of cognitive, social, and emotional development during infancy, childhood, adolescence, and adulthood.....	4
SKILL 1.4 Understand child and adolescent psychology. Includes sources and characteristics of stress and distress among children and adolescents, mechanisms used in coping with stress, the influence of peers and others in determining social behavior among children and adolescents, and ways to help students develop a positive self-concept.....	6
SKILL 1.5 Understand the components, functions, and common disorders of the skeletal system	9
SKILL 1.6 Understand the components, functions, and common disorders of the muscular system; and physiological processes involving the muscular system.....	11
SKILL 1.7 Understand the components, functions, and common disorders of the circulatory system; and physiological processes involving the circulatory system.....	13
SKILL 1.8 Understand the components, functions, and common disorders of the respiratory system; and physiological processes involving the respiratory system	15
SKILL 1.9 Understand the components, functions, and common disorders of the nervous system; and physiological processes involving the nervous system	16
COMPETENCY 2.0 PHYSICAL FITNESS	19
SKILL 2.1 Basic principles of physical fitness development, goals .. of physical fitness based on standards for students of different ages, and the relationship between physical fitness and psychological well-being	19

Competency/Skill #	Page #
SKILL 2.2 Analyze elements of health-related physical fitness related to cardiovascular function, body composition, flexibility, and muscular strength and endurance.....	21
SKILL 2.3 The basic principles of physical conditioning, flexibility, aerobic and anaerobic conditioning, and strength training	21
SKILL 2.4 Types of skills and activities for aerobic conditioning and strength training; and safety practices and types of equipment for strength training and circuit training.....	25
SKILL 2.5 Select physical activities for specific kinds of training. Includes appropriate activities for warm-up exercises, static and dynamic stretching, cool down exercises; and appropriate exercises for other specific purposes.....	44
SKILL 2.6 The effects of exercise and training on the cardio-respiratory and musculoskeletal systems, and on body composition	48
SKILL 2.7 Techniques for measuring and evaluating the components of physical fitness, sources for standards of physical fitness, individual fitness needs for specific activities, and the appropriate use of results of physical fitness assessments	50
COMPETENCY 3.0 MOTOR SKILL ACQUISITION	55
SKILL 3.1 The principles of force generation and absorption, stability and balance, and speed and acceleration in physical activities.....	55
SKILL 3.2 The principles of practice distribution, feedback, and transfer of learning as they relate to skill acquisition	63
SKILL 3.3 The concepts and consequences of competition and cooperation, the cause and effects of anxiety related to physical activities, and the relationships between physical education activities and psychological development	65
SKILL 3.4 Locomotor and nonlocomotor skills and activities that are appropriate for various developmental levels	67
SKILL 3.5 Identify principles and activities for manipulative skills development. Includes the integration of locomotor, nonlocomotor, and manipulative skills; materials and equipment for promoting manipulative skills development; and manipulative activities that are appropriate for various developmental levels	70

Competency/Skill #	Page #
SKILL 3.6 Identify principles and activities for developing correct posture and efficient body mechanics. Includes principles and activities for developing correct posture and efficient body mechanics, materials and equipment for evaluating posture and body mechanics, and posture and body mechanics activities that are appropriate for various developmental levels	74
SKILL 3.7 Identify principles and activities for perceptual motor development. Includes principles of perceptual motor development, perceptual motor development activities, and materials, and equipment that are appropriate for various developmental levels	76
SKILL 3.8 Identify principles and activities for developing rhythmic skills. Includes elements of rhythm, movement activities, materials, and equipment for rhythmic skills development, and rhythmic movement activities that are appropriate for various developmental levels	77
SKILL 3.9 Identify concepts and activities for "movement education." Includes concepts of basic movement skills and "movement education" activities that are appropriate for various developmental levels	78
SKILL 3.10 Identify techniques, skills, and activities of dance and creative movement. Includes techniques and activities involving creative movement sequences and rhythm techniques, sequences, and skills in folk, square, and ballroom dancing	80
SKILL 3.11 Identify techniques and skills of gymnastics. Includes types of skills, activities, skill progression, safety practices, and types of equipment for gymnastics.....	83
SKILL 3.12 Identify techniques and skills of tumbling. Includes types of skills and activities, skill progression, safety practices, and types of equipment for tumbling	85
SKILL 3.13 Identify techniques and skills of swimming. Includes techniques and skills, skill progression, safety practices, and proper use of equipment for swimming.....	86
SKILL 3.14 Identify techniques, events, skills, and basic rules involved in track and field. Includes techniques, skills, strategies, skill progression, safety practices, types of equipment, and basic rules for track and field.....	87
SKILL 3.15 Identify techniques, skills, and basic rules involved in racquet sports. Includes techniques, skills, and basic rules of tennis and badminton safety; and practices and types of equipment for racquet sports.....	88

Competency/Skill #	Page #
SKILL 3.16 Identify techniques, skills, and basic rules involved in combative activities. Includes techniques, skills, basic rules, safety practices, and types of equipment for combative activities	98
SKILL 3.17 Identify techniques, skills, and basic rules involved in lifelong sports. Includes techniques, skills, and basic rules of golf, bowling, and archery	98
SKILL 3.18 Identify skills and elements of low organized games in the elementary program. Includes low organized games appropriate for various developmental levels and the skills needed for low organized games for the elementary program.....	105
SKILL 3.19 Identify techniques, skills, and basic rules of volleyball and basketball. Includes techniques, skills, strategies, skill progression, safety practices, types of equipment, basic rules, and scoring methods in volleyball and basketball	106
SKILL 3.20 Identify techniques, skills, and basic rules of soccer and flag or touch football. Includes techniques, skills, strategies, skill progression, safety practices, types of equipment, basic rules, and scoring methods in soccer and flag or touch football.....	113
SKILL 3.21 Identify techniques, skills, and basic rules of softball and floor hockey. Includes techniques, skills, strategies, skill progression, safety practices, types of equipment, basic rules, and scoring methods in softball and floor hockey	118
 COMPETENCY 4.0 PROGRAM DEVELOPMENT AND IMPLEMENTATION	 120
SKILL 4.1 Philosophies, major goals, purposes, and current trends in physical education	120
SKILL 4.2 Understand curricular development of physical education programs. Includes components of curriculum development, appropriate objectives, appropriate scope and sequence, and appropriate activities to fulfill the objectives in physical education programs	125
SKILL 4.3 Identify instructional approaches to physical education. Includes instructional methods and their characteristics, appropriate methods of accommodating individual differences, and appropriate instructional methods for various objectives and situations in physical education	128

Competency/Skill #	Page #
SKILL 4.4 Identify characteristics and methods of instruction for students with special educational needs. Includes types, characteristics, and appropriate methods of instruction for students with various handicapping conditions, gifted students, and students of different cultural or linguistic backgrounds	132
SKILL 4.5 Understand the management of physical education programs. Includes care and maintenance procedures for facilities and equipment used in physical education programs, and financial issues related to physical education programming	134
SKILL 4.6 Identify resources for professional development in physical education. Includes professional organizations, associations, journals, and other publications related to physical education.....	137
SKILL 4.7 Identify assessment techniques and their characteristics. Includes formal and informal assessment techniques and their characteristics and widely used assessment instruments and performance standards in physical education	139
SKILL 4.8 Understand physical education program evaluation. Includes criteria and procedures for evaluating physical education programs, the appropriate use of physical education program evaluations and ways to adapt or modify the physical education program based on evaluation results.....	144
SKILL 4.9 Identify safety practices. Includes requirements and procedures for maintaining a safe physical education environment and a safe environment for aquatic activities	145
SKILL 4.10 Identify principles of emergency first aid assistance. Includes emergency first aid procedures related to the control of bleeding, stoppage of breathing, shock, and other situations and injuries common to physical activities their characteristics, and methods of prevention and care	148
SKILL 4.11 Identify legal aspects of the physical education program. Includes federal laws, state laws, and other legal aspects of liability affecting the physical education program and laws and requirements for the physical education of students with special needs	151
Annotated List of Resources	158
Sample Test	160
Answer Key	186
Rationales with Sample Questions	187
