

Table of Contents

Great Study and Testing Tips xi

SUBAREA I. SCIENTIFIC INQUIRY

**COMPETENCY 0001 UNDERSTANDING THE HISTORICAL AND
CONTEMPORARY CONTEXTS OF THE STUDY OF
BIOLOGY 1**

Skill 1.1 Historical Perspectives 1

Skill 1.2 Current Issues 2

**COMPETENCY 0002 UNDERSTANDING THE NATURE OF SCIENCE AND
SCIENTIFIC INQUIRY..... 3**

Skill 2.1 Processes by which science advances (Scientific Inquiry 3

Skill 2.2 Role of empirical data..... 4

Skill 2.3 Ethical issues related to scientific processes..... 5

Skill 2.4 The role of communication among scientists, and between
scientists and the public in promoting scientific progress 6

**COMPETENCY 0003 UNDERSTANDING THE PRINCIPLES AND
PROCEDURES OF SCIENTIFIC INVESTIGATIONS 7**

Skill 3.1 Measurement 7

Skill 3.2 Sampling techniques 7

Skill 3.3 Safety 8

Skill 3.4 Use of Animals 10

TEACHER CERTIFICATION STUDY GUIDE

Skill 3.5	The identification of questions that can be answered using methods of scientific inquiry	10
-----------	--	----

COMPETENCY 0004 UNDERSTANDING THE PROCESSES OF GATHERING, ORGANIZING, REPORTING AND ANALYZING SCIENTIFIC DATA IN THE CONTEXT OF BIOLOGY INVESTIGATIONS..... 11

Skill 4.1	A scientific investigation	11
-----------	----------------------------------	----

Skill 4.2	Scientific Ethics	12
-----------	-------------------------	----

Skill 4.3	The design and use of graphic representations and/or models	13
-----------	---	----

Skill 4.4	The application of simple descriptive statistics to data (e.g., mean, median, mode)	13
-----------	---	----

Skill 4.5	The analysis of data to identify limitations, make predictions, and draw conclusions	14
-----------	--	----

Skill 4.6	Procedures for formally reporting experimental results and data to the scientific community	15
-----------	---	----

COMPETENCY 0005 UNDERSTANDING HOW BIOLOGY INTERRELATES WITH SOCIETY, TECHNOLOGY, AND THE OTHER SCIENCES AND APPLIES TO EVERYDAY LIFE..... 16

Skill 5.1	Unifying concepts and processes among the sciences	16
-----------	--	----

Skill 5.2	The impact of biology and technology on one another and on society	17
-----------	--	----

Skill 5.3	Differences and similarities between science and technology	18
-----------	---	----

Skill 5.4	The application of biology to daily life and personal decision making	18
-----------	---	----

TEACHER CERTIFICATION STUDY GUIDE

SUBAREA II.

CELLS AND CELL THEORY

COMPETENCY 0006	UNDERSTANDING CELL STRUCTURE AND FUNCTION AND THE CELL THEORY	19
Skill 6.1	Cell Types	19
Skill 6.2	Comparison of different types of cells (e.g., plant and animal cells, prokaryotic and eukaryotic cells)	20
Skill 6.3	Structures, functions, and interrelationships between cell organelles and other cell components	21
Skill 6.4	Basic tenets and implications of cell theory	24
COMPETENCY 0007	UNDERSTANDING THE CHEMICAL COMPONENTS OF LIVING SYSTEMS AND BASIC PRINCIPLES OF BIOCHEMISTRY	25
Skill 7.1	Properties and significance of water	25
Skill 7.2	Structures, functions, and composition of lipids, carbohydrates, proteins, amino acids, and nucleic acids	26
COMPETENCY 0008	ANALYZING PHYSIOLOGICAL PROCESSES OF CELLS	30
Skill 8.1	Processes of protein synthesis	30
Skill 8.2	Process of Photosynthesis	33
Skill 8.3	Processes of aerobic and anaerobic respiration.....	36
COMPETENCY 0009	ANALYZING CELL GROWTH, DIVISION, AND DIFFERENTIATION	40
Skill 9.1	Cell growth, division, and differentiation	40

TEACHER CERTIFICATION STUDY GUIDE

Skill 9.2 Consequences of normal and abnormal mitotic and meiotic divisions..... 44

Skill 9.3 Factors that affect cell growth, division, and differentiation 44

SUBAREA III. CHARACTERISTICS OF ORGANISMS

COMPETENCY 0010 UNDERSTANDING PRINCIPLES OF TAXONOMY AND CLASSIFICATION IN BIOLOGY 46

Skill 10.1 Taxonomy..... 46

Skill 10.2 Taxonomic relationships among organisms (including both living and extinct organisms)..... 47

COMPETENCY 0011 ANALYZING REPRODUCTION, DEVELOPMENT, AND LIFE CYCLES OF LIVING ORGANISMS 49

Skill 11.1 Reproductive strategies of common organisms..... 49

Skill 11.2 Characteristics of developing embryos of plants and animals 50

Skill 11.3 Characteristics of sexual and asexual reproduction 51

Skill 11.4 Advantages and disadvantages of sexual and asexual reproduction 53

Skill 11.5 Life cycles of common organisms..... 54

COMPETENCY 0012 ANALYZING THE PROCESSES USED BY LIVING ORGANISMS TO OBTAIN, STORE, AND USE ENERGY 55

Skill 12.1 Differentiate between how different categories of organisms obtain energy 55

Skill 12.2 Structures used to store food 55

TEACHER CERTIFICATION STUDY GUIDE

Skill 12.3	Processes involved in the distribution of food to all parts of an organism.....	56
Skill 12.4	Knowledge of transport in plants	57
Skill 12.5	Ways in which organisms use food	57

COMPETENCY 0013 ANALYZING THE ANATOMY AND PHYSIOLOGY OF LIVING ORGANISMS 59

Skill 13.1	Fundamental Concepts	59
Skill 13.2	Functions of and relationships among given tissues, organs, and organ systems	60
Skill 13.3	Adaptations of structures and processes.....	60

SUBAREA IV. HUMAN BIOLOGY

COMPETENCY 0014 UNDERSTANDING THE STRUCTURES AND FUNCTIONS OF THE HUMAN SKELETAL, MUSCULAR, INTEGUMENTARY, CIRCULATORY, AND IMMUNE SYSTEMS 62

Skill 14.1	Human skeletal system	62
Skill 14.2	Human muscular system	63
Skill 14.3	Integumentary system	63
Skill 14.4	Circulatory system	64
Skill 14.5	Immune system.....	65
Skill 14.6	Components and functions of blood and lymph.....	67

TEACHER CERTIFICATION STUDY GUIDE

Skill 14.7	Homeostatic roles of the skeletal, muscular, circulatory, and immune systems.....	69
------------	---	----

COMPETENCY 0015 UNDERSTANDING THE STRUCTURES AND FUNCTIONS OF THE HUMAN RESPIRATORY, EXCRETORY, AND DIGESTIVE SYSTEMS, AND THE PRINCIPLES OF HUMAN NUTRITION 71

Skill 15.1	Human respiratory structures	71
------------	------------------------------------	----

Skill 15.2	Human excretory system.....	71
------------	-----------------------------	----

Skill 15.3	Human digestive system	72
------------	------------------------------	----

Skill 15.4	The exchange of materials and gases between the blood and other tissues	73
------------	---	----

Skill 15.5	Human nutrition	73
------------	-----------------------	----

Skill 15.6	Diseases of the human respiratory, excretory, and digestive systems	74
------------	---	----

Skill 15.7	Homeostatic roles of the respiratory, excretory, and digestive systems within the body	74
------------	--	----

COMPETENCY 0016 UNDERSTANDING THE STRUCTURES AND FUNCTIONS OF THE HUMAN NERVOUS, ENDOCRINE, AND REPRODUCTIVE SYSTEMS, AND THE PROCESSES OF EMBRYONIC DEVELOPMENT 76

Skill 16.1	The nervous system	76
------------	--------------------------	----

Skill 16.2	The endocrine system	77
------------	----------------------------	----

Skill 16.3	The role of feedback mechanisms in the functioning of the nervous, endocrine, and reproductive systems.....	78
------------	---	----

TEACHER CERTIFICATION STUDY GUIDE

Skill 16.4	Reproduction	78
Skill 16.5	Common diseases and disorders of the nervous, endocrine, and reproductive systems.....	79

SUBAREA V. PRINCIPLES OF HEREDITY

COMPETENCY 0017 UNDERSTANDING THE PRINCIPLES OF MENDELIAN AND NON-MENDELIAN GENETICS..... 82

Skill 17.1	Mendelian genetics.....	82
Skill 17.2	The relationship of Mendelian genetics to the structure and behavior of chromosomes	84
Skill 17.3	Crossing-over and its effect on genotype and phenotype.....	85
Skill 17.4	Sex-linked characteristics	85
Skill 17.5	Dominance	86
Skill 17.6	Polygenic inheritance	87
Skill 17.7	Non-Mendelian genetics.....	87
Skill 17.8	Application of genetic principles to solve problems involving genetic crosses	88

COMPETENCY 0018 UNDERSTANDING THE SYNTHESIS OF DNA, RNA, AND PROTEIN..... 90

Skill 18.1	Relationship of molecular structure to the synthesis of DNA, RNA, and protein	90
Skill 18.2	The genetic code and its related processes	90

TEACHER CERTIFICATION STUDY GUIDE

COMPETENCY 0019 UNDERSTANDING GENES, CHROMOSOMES, AND CHANGES IN GENETIC MATERIAL95

Skill 19.1	Gene structure and function and the relationship between genes and chromosomes.....	95
Skill 19.2	Factors contributing to genetic mutations and their consequences (changes in DNA	95
Skill 19.3	The influence of environment on heredity.....	97
Skill 19.4	Genetic engineering and gene therapy.....	97

COMPETENCY 0020 UNDERSTANDING THE PROCESSES OF NATURAL SELECTION AND ADAPTATION..... 100

Skill 20.1	Variation	100
Skill 20.2	Evolution.....	100
Skill 20.3	Natural selection.....	102
Skill 20.4	The influence of selection pressures on species adaptations.....	102
Skill 20.5	Evidence that species change over time	103

SUBAREA VI. MATTER AND ENERGY IN ECOSYSTEMS

COMPETENCY 0021 UNDERSTANDING POPULATIONS AND COMMUNITIES..... 105

Skill 21.1	Basic requirements of organisms (e.g., food, habitat, shelter).....	105
Skill 21.2	Populations.....	105

TEACHER CERTIFICATION STUDY GUIDE

Skill 21.3	Common patterns of interdependence and interrelationships among species in a community	106
Skill 21.4	Analyze food webs, including the roles of and relationships among producers, consumers, and decomposers.....	107
Skill 21.5	Role of decomposers in nutrient cycling	108
Skill 21.6	Concept of niche; and energy relationships within food chains and food webs	108
COMPETENCY 0022 UNDERSTANDING TYPES AND CHARACTERISTICS OF ECOSYSTEMS AND BIOMES, AND FACTORS AFFECTING THEIR CHANGE OVER TIME		110
Skill 22.1	Pyramid of productivity	110
Skill 22.2	Biomes	110
COMPETENCY 0023 ANALYZING THE CYCLING OF MATERIALS THROUGH AN ECOSYSTEM		113
Skill 23.1	Characteristics and processes of biogeochemical cycles (e.g., water, carbon-oxygen, nitrogen, phosphorus).....	113
Skill 23.2	Implications of biogeochemical cycles for living things	114
COMPETENCY 0024 UNDERSTANDING THE PHYSICAL AND SOCIETAL EFFECTS OF HUMAN ACTIVITIES ON THE ENVIRONMENT		115
Skill 24.1	Rate of growth	115
Skill 24.2	Food production and the world food supply	116

TEACHER CERTIFICATION STUDY GUIDE

Skill 24.3	Issues related to the availability, distribution, and use of water, space, and energy	117
Skill 24.4	Chemical and physical mechanisms (e.g., burning of fossil fuels) by which pollutants (e.g., acid precipitation) are created.....	118
Skill 24.5	Methods of pollution control, resource conservation (e.g., recycling), land reclamation, and environmental preservation	120
Sample Test		121
Answer Key		145
Rationales with Sample Question		146
