

Table of Contents

Periodic Table of the Elements.....xi

SUBAREA I. SCIENTIFIC INQUIRY

Competency 1.0 Understand the historical and contemporary contexts of the study of chemistry 1

Competency 2.0 Understand the nature of science and scientific inquiry 8

Competency 3.0 Understand principles and procedures of scientific investigations 15

Competency 4.0 Understand the processes of gathering, organizing, reporting, and analyzing scientific data in the context of chemistry investigations..... 22

Competency 5.0 Understand the interrelationships among chemistry, society, technology, and the other sciences and the applications of chemistry to everyday life 44

Competency 6.0 Understand principles and procedures related to safety 46

SUBAREA II. MATTER AND ATOMIC STRUCTURE

Competency 7.0 Understand the concept of matter, and analyze chemical and physical properties of and changes in matter 69

Competency 8.0 Understand the various models of atomic structure, the principles of quantum theory, and the properties and interactions of subatomic particles..... 75

Competency 9.0 Understand the organization of the periodic table..... 91

Competency 10.0 Understand the kinetic theory, the nature of phase changes, and the gas laws 100

Competency 11.0 Apply the conventions of chemical notation and representations 107

Competency 12.0 Understand the process of nuclear transformation ... 119

TEACHER CERTIFICATION STUDY GUIDE

SUBAREA III

ENERGY, CHEMICAL BONDS, AND MOLECULAR STRUCTURE

Competency 13.0	Understand the principles of thermodynamics and calorimetry	130
Competency 14.0	Understand energy relationships in chemical bonding and chemical reactions	138
Competency 15.0	Understand the types of bonds between atoms, the formation of these bonds, and properties of substances containing the different bonds.....	140
Competency 16.0	Understand types and characteristics of molecular interaction and properties of substances containing different types of interactive forces between molecules	147
Competency 17.0	Understand the nomenclature and structure of organic compounds	154

SUBAREA IV.

CHEMICAL REACTIONS

Competency 18.0	Understand factors that affect reaction rates and methods of measuring reaction rates.....	169
Competency 19.0	Understand the principles of chemical equilibrium	178
Competency 20.0	Understand the theories, principles, and applications of acid-base chemistry	189
Competency 21.0	Understand redox reactions and electrochemistry....	201
Competency 22.0	Understand the nature of organic reactions.....	211

TEACHER CERTIFICATION STUDY GUIDE

SUBAREA V.

QUANTITATIVE RELATIONSHIPS

Competency 23.0	Understand the mole concept.....	217
Competency 24.0	Understand the relationship between the mole concept and chemical formulas.....	219
Competency 25.0	Understand the quantitative relationships expressed in chemical equations.....	222
Competency 26.0	Understand the properties of solutions, and analyze factors that affect solubility	231
Sample Selected-Response Questions.....		240
Answer Key		265
Answers with Solutions		266
Sample Written Performance Assignments		332
Sample Written Performance Responses.....		334
