

TEACHER CERTIFICATION STUDY GUIDE

Table of Contents

PART I. UNDERSTANDING AND SKILL IN PHYSICS

SUBAREA I. MOTION AND FORCES

COMPETENCY 1.1 MOTION AND FORCES

Skill 1.1a	Discuss and apply Newton's laws	1
Skill 1.1b	Solve problems using Newton's Second Law	3
Skill 1.1c	Define pressure and relate it to fluid flow and buoyancy.....	4
Skill 1.1d	Describe the relationships among position, distance, displacement, speed, velocity, acceleration, and time, and perform simple calculations using these variables for both linear and circular motion	7
Skill 1.1e	Construct and analyze simple vector and graphical representations of motion and forces	10
Skill 1.1f	Generate and understand functional relationships of graphs showing distance, velocity, and acceleration versus time.....	13
Skill 1.1g	Recognize relationships among variables for linear motion and rotational motion.....	14
Skill 1.1h	Solve 2-dimensional problems involving vector analysis of motion and forces, including projectile motion, uniform circular motion, and statics....	16
Skill 1.1i	Identify the separate forces that act on a body and describe the net force on the body	18
Skill 1.1j	Construct appropriate free-body diagrams of many-body problems	21
Skill 1.1k	Solve periodic motion problems	23
Skill 1.1l	Solve problems involving linear and rotational motion in term of forces and torques.....	25
Skill 1.1m	Identify fundamental forces, including gravity, nuclear forces, and electromagnetic forces, and explain their roles in nature.....	27
Skill 1.1n	Explain and calculate mechanical advantages for levers, pulleys, and inclined planes	29

TEACHER CERTIFICATION STUDY GUIDE

SUBAREA II. CONSERVATION OF ENERGY AND MOMENTUM

COMPETENCY 2.1 CONSERVATION OF ENERGY AND MOMENTUM

Skill 2.1a	Use conservation of energy to characterize kinetic-potential energy systems such as oscillating systems, projectile motion, and roller coasters	31
Skill 2.1b	Analyze elastic and inelastic collisions and solve for unknown values	32
Skill 2.1c	Solve problems involving linear and rotational motion in terms of conservation of momentum and energy	33
Skill 2.1d	Recognize relationships between energy/momentum conservation principles and Newton's Laws	36
Skill 2.1e	Examine the impact of friction on conservation principles	37
Skill 2.1f	Interpret force-versus-time and force-versus-distance graphs to find, for example, work done or impulse on a system	38

SUBAREA III. HEAT AND THERMODYNAMICS

COMPETENCY 3.1 HEAT AND THERMODYNAMICS

Skill 3.1a	Solve problems involving the laws of thermodynamics using the relationships among work, heat flow, energy, and entropy	40
Skill 3.1b	Define and correctly apply thermodynamic properties of materials such as specific heat, heats of fusion, heat of vaporization, thermal conductivity, and thermal expansion to solve problems	42
Skill 3.1c	Solve problems for ideal gas systems	46
Skill 3.1d	Interpret graphs showing phase changes and graphs of cyclic processes	49
Skill 3.1e	Solve problems involving cyclic processes, including calculations of work done, heat gain/loss, and entropy change.....	53
Skill 3.1f	Describe a plasma, state its characteristic properties, and contrast it with an ideal gas.....	57

TEACHER CERTIFICATION STUDY GUIDE

SUBAREA IV.

WAVES

COMPETENCY 4.1 WAVES

Skill 4.1a	Compare the characteristics of sound, light, and seismic waves.....	58
Skill 4.1b	Explain that energy is transferred by waves without mass transfer and provide examples	59
Skill 4.1c	Explain how lenses are used in simple optical systems, including the camera, telescope, microscope, and the eye.....	60
Skill 4.1d	Explain and apply the laws of reflection and refraction	62
Skill 4.1e	Compare transmission, reflection, and absorption of light in matter	64
Skill 4.1f	Relate wave propagation to properties of materials.....	65
Skill 4.1g	Describe, distinguish, and solve both conceptual and numerical problems involving interference, diffraction, refraction, reflection, Doppler effect, polarization, dispersion, and scattering	66

SUBAREA V.

ELECTROMAGNETISM

COMPETENCY 5.1 ELECTROMAGNETISM

Skill 5.1a	Describe and provide examples of electrostatic and magnetostatic phenomena.....	71
Skill 5.1b	Predict charges or poles based on attraction/repulsion observations.....	72
Skill 5.1c	Build a simple compass and use it to determine direction of magnetic fields, including the Earth's magnetic field	73
Skill 5.1d	Analyze electric and magnetic forces, charges, and fields using Coulomb's law, the Lorentz force, and the right-hand rule	75
Skill 5.1e	Relate electric currents to magnetic fields and describe the application of these relationships, such as in electromagnets, electric current generators, motors, and transformers.....	79
Skill 5.1f	Solve problems involving the relationships between electric and magnetic phenomena.....	84
Skill 5.1g	Define and calculate power, voltage differences, current, and resistance in simple circuits.....	86
Skill 5.1h	Design and interpret simple series and parallel circuits	88
Skill 5.1i	Apply energy principles to analyze problems in electricity, magnetism, and circuit theory involving capacitors, resistors, and inductors	90

TEACHER CERTIFICATION STUDY GUIDE

Skill 5.1j	Calculate power, voltage changes, current, and resistance in multiloop circuits involving capacitors, resistors, and inductors	93
Skill 5.1k	Interpret and design mixed series and parallel circuits involving capacitors, resistors, and inductors	97
Skill 5.1l	Explain properties of transistors, diodes, and semiconductors	99

SUBAREA 6. QUANTUM MECHANICS AND THE STANDARD MODEL OF PARTICLES

COMPETENCY 6.1 QUANTUM MECHANICS AND THE STANDARD MODEL OF PARTICLES

Skill 6.1a	Distinguish the four fundamental forces of nature, describe their ranges, and identify their force carriers	101
Skill 6.1b	Evaluate the assumptions and relevance of the Bohr model of the atom	101

PART II. SKILLS AND ABILITIES APPLICABLE TO THE CONTENT DOMAINS IN SCIENCE

SUBAREA I. INVESTIGATION AND EXPERIMENTATION

COMPETENCY 1.1 QUESTION FORMULATION

Skill 1.1a.	Formulate and evaluate a viable hypothesis	103
Skill 1.1b.	Recognize the value and role of observation prior to question formulation	103
Skill 1.1c.	Recognize the iterative nature of questioning.....	104
Skill 1.1d.	Given an experimental design, identify possible hypotheses that it may test	104

COMPETENCY 1.2. PLANNING A SCIENTIFIC INVESTIGATION

Skill 1.2a.	Given a hypothesis, formulate an investigation or experimental design to test that hypothesis.....	105
Skill 1.2b.	Evaluate an experimental design for its suitability to test a given hypothesis	105
Skill 1.2c.	Distinguish between variable and controlled parameters.....	106

TEACHER CERTIFICATION STUDY GUIDE

COMPETENCY 1.3 OBSERVATION AND DATA COLLECTION

Skill 1.3a.	Identify changes in natural phenomena over time without manipulating the phenomena.....	107
Skill 1.3b.	Analyze the locations, sequences, and time intervals that are characteristic of natural phenomena.....	108
Skill 1.3c.	Select and use appropriate tools and technology to perform tests, collect data, analyze relationships, and display data.....	109
Skill 1.3d.	Evaluate the precision, accuracy, and reproducibility of data.....	110
Skill 1.3e.	Identify and analyze possible reasons for inconsistent results, such as sources of error or uncontrolled conditions.....	110
Skill 1.3f.	Identify and communicate sources of unavoidable experimental error ..	111
Skill 1.3g.	Recognize the issues of statistical variability and explain the need for controlled tests.....	111
Skill 1.3h.	Know and evaluate the safety issues when designing an experiment and implement appropriate solutions to safety problems.....	111
Skill 1.3i.	Appropriately employ a variety of print and electronic resources to collect information and evidence as part of a research project.....	113
Skill 1.3j.	Assess the accuracy validity and reliability of information gathered from a variety of sources.....	113

COMPETENCY 1.4 DATA ANALYSIS/GRAPHING

Skill 1.4a.	Construct appropriate graphs from data and develop qualitative and quantitative statements about relationships between variables.....	114
Skill 1.4b.	Recognize the slope of the linear graph as the constant in the relationship $y=kx$ and apply this principle in interpreting graphs constructed from data.....	115
Skill 1.4c.	Apply simple mathematical relationships to determine a missing quantity in an algebraic expression, given the two remaining terms.....	115
Skill 1.4d.	Determine whether a relationship on a given graph is linear or non-linear and determine the appropriateness of extrapolating the data.....	116
Skill 1.4e.	Solve scientific problems by using quadratic equations and simple trigonometric, exponential, and logarithmic functions.....	117

TEACHER CERTIFICATION STUDY GUIDE

COMPETENCY 1.5 DRAWING CONCLUSIONS AND COMMUNICATING EXPLANATIONS

Skill 1.5a.	Draw appropriate and logical conclusions from data	120
Skill 1.5b.	Communicate the logical connection among hypotheses, science concepts, tests conducted, data collected, and conclusions drawn from the scientific evidence.....	120
Skill 1.5c.	Communicate the steps and results of an investigation in written reports and oral presentations.....	120
Skill 1.5d.	Recognize whether evidence is consistent with a proposed explanation	120
Skill 1.5e.	Construct appropriate visual representations of scientific phenomenon and processes.....	120
Skill 1.5f.	Read topographic and geologic maps for evidence provided on the maps and construct and interpret a simple scale map.....	120

SUBAREA II.

NATURE OF SCIENCE

COMPETENCY 2.1. SCIENTIFIC INQUIRY

Skill 2.1a.	Distinguish among the terms hypothesis, theory, and prediction as used in scientific investigations	121
Skill 2.1b.	Evaluate the usefulness, limitations, and interdisciplinary and cumulative nature of scientific evidence as it relates to the development of models and theories as representations of reality.....	122
Skill 2.1c.	Recognize that when observations do not agree with an accepted scientific theory, either the observations are mistaken or fraudulent, or the accepted theory is erroneous or incorrect.....	122
Skill 2.1d.	Understand that reproducibility of data is critical to the scientific endeavor	123
Skill 2.1e.	Recognize that science is a self- correcting process that eventually identifies misconceptions and experimental biases	123
Skill 2.1f.	Recognize that an inquiring mind is at the heart of the scientific method and that doing science involves thinking critically about the evidence presented, the usefulness of models, and the limitations of theories.....	123
Skill 2.1g.	Recognize that theories are judged by how well they explain observations and predict results and that when they represent new ideas that are counter to mainstream ideas they often encounter vigorous criticism	124
Skill 2.1h.	Recognize that when observations, data, or experimental results do not agree, the unexpected results are not necessarily mistakes.....	124

TEACHER CERTIFICATION STUDY GUIDE

Skill 2.1i.	Know why curiosity, honesty, openness, and skepticism are so highly regarded in science and how they are incorporated into the way science is carried out	125
-------------	---	-----

COMPETENCY 2.2 SCIENTIFIC ETHICS

Skill 2.2a.	Understand that honesty is at the core of scientific ethics; first and foremost is the honest and accurate reporting of procedures used and data collected	126
Skill 2.2b.	Know that all scientists are obligated to evaluate the safety of an investigation and ensure the safety of those performing the experiment	127
Skill 2.2c.	Know the procedures for respectful treatment of all living organisms in experimentation and other investigations	127

COMPETENCY 2.3 HISTORICAL PERSPECTIVES

Skill 2.3a.	Discuss the cumulative nature of scientific evidence as it relates to the development of models and theories	128
Skill 2.3b.	Recognize that as knowledge in science evolves, when observations do not support an accepted scientific theory, the observations are reconsidered to determine if they are mistaken or fraudulent, or if the accepted theory is erroneous or incomplete.....	129
Skill 2.3c.	Recognize and provide specific examples that scientific advances sometimes result in profound paradigm shifts in scientific theories	130

SUBAREA III. SCIENCE AND SOCIETY

COMPETENCY 3.1 SCIENCE LITERACY

Skill 3.1a.	Recognize that science attempts to make sense of how the natural and the designed world function	131
Skill 3.1b.	Demonstrate the ability to apply critical and independent thinking to weigh alternative explanations of events	131
Skill 3.1c.	Apply evidence, numbers, patterns, and logical arguments to solve problems.....	131
Skill 3.1d.	Understand that, although much has been learned about the objects, events and phenomena in nature, there are many unanswered questions, i.e., science is a work in progress	131
Skill 3.1e.	Know that the ability of science and technology to resolve societal problems depends on the scientific literacy of a society	133

TEACHER CERTIFICATION STUDY GUIDE

COMPETENCY 3.2 DIVERSITY

- Skill 3.2a. Identify examples of women and men of various social and ethnic backgrounds with diverse interests, talents, qualities and motivations who are, or who have been, engaged in activities of science and related fields 134

COMPETENCY 3.3 SCIENCE, TECHNOLOGY, AND SOCIETY

- Skill 3.3 a. Identify and evaluate the impact of scientific advances on society 135
- Skill 3.3 b. Recognize that scientific advances may challenge individuals to reevaluate their personal beliefs..... 136

COMPETENCY 3.4 SAFETY

- Skill 3.4a. Choose appropriate safety equipment for a given activity 137
- Skill 3.4b. Discuss the safe use, storage, and disposal of commonly used chemicals and biological specimens..... 137
- Skill 3.4c. Assess the safety conditions needed to maintain a science laboratory . 138
- Skill 3.4d. Read and decode MSDS/OSHA labels on laboratory supplies and equipment 139
- Skill 3.4e. Discuss key issues in the disposal of hazardous materials in either the laboratory or the local community..... 140
- Skill 3.4f. Be familiar with standard safety procedures such as those outlined in the Science Safety Handbook for California Schools (1999)..... 140

Sample Test..... 141

Answer Key 160

Rigor Analysis Table 161

Rationales with Sample Questions 162
