

Table of Contents

	Pg. #
COMPETENCY 1.0 UNDERSTAND CELL STRUCTURE AND FUNCTION	
Skill 1.1 Demonstrating knowledge of the components of cells and how the structure of cell organelles relates to their function	1
Skill 1.2 Comparing the characteristics of prokaryotic and eukaryotic cells.....	5
Skill 1.3 Analyzing the interactions among cell organelles.....	5
Skill 1.4 Demonstrating knowledge of the structure and function of different types of cell	6
COMPETENCY 2.0 UNDERSTAND THE BASIC CHEMICAL COMPONENTS AND REACTIONS OF CELLS	
Skill 2.1 Recognizing the chemical elements necessary for life and demonstrating knowledge of how these elements combine to form biologically important organic and inorganic compounds	8
Skill 2.2 Analyzing the differences between anaerobic and aerobic respiration and their products	10
Skill 2.3 Recognizing the role of enzymes as catalysts in cellular reactions and factors that affect enzyme function.....	13
Skill 2.4 Identifying the structure and function of different biomolecules.....	13
COMPETENCY 3.0 UNDERSTAND THE PHYSIOLOGICAL PROCESSES OF CELLS	
Skill 3.1 Demonstrating knowledge of how cells maintain homeostasis.....	18
Skill 3.2 Analyzing the processes of photosynthesis and cellular respiration and the relationships between the two processes.....	19
Skill 3.3 Analyzing transport mechanisms across the cell membrane	21
Skill 3.4 Recognizing the role of electron transport systems and ATP in respiration and photosynthesis.....	23

TEACHER CERTIFICATION STUDY GUIDE

COMPETENCY 4.0 UNDERSTAND THE PROCESSES OF CELL DIVISION, GROWTH, AND DIFFERENTIATION

Skill 4.1	Comparing the processes of mitosis, meiosis, and binary fission	24
Skill 4.2	Demonstrating knowledge of the phases of the cell cycle and the effects of unregulated cell growth.....	28
Skill 4.3	Analyzing the role of cell differentiation in the development of tissues	28
Skill 4.4	Analyzing factors that affect cell division and differentiation	29

COMPETENCY 5.0 UNDERSTAND THE PRINCIPLES OF HEREDITY

Skill 5.1	Applying knowledge of the laws of probability to determine genotypic and phenotypic frequencies in Mendelian inheritance.....	30
Skill 5.2	Demonstrating knowledge of the relationship of the behavior of chromosomes during meiosis and fertilization to inheritance patterns	32
Skill 5.3	Recognizing factors influencing the transmission of genes from one generation to the next	33
Skill 5.4	Recognizing how the genotype of an organism influences the expression of traits in its phenotype	34
Skill 5.5	Analyzing effects of environmental factors on the expression of traits in the phenotype of an organism	35

TEACHER CERTIFICATION STUDY GUIDE

COMPETENCY 6.0 UNDERSTAND THE MOLECULAR BASIS OF GENETICS AND GENETIC ENGINEERING

Skill 6.1	Identifying the structures and functions of DNA and RNA in organisms	37
Skill 6.2	Analyzing the mechanisms of replication, transcription, and translation	37
Skill 6.3	Demonstrating knowledge of the characteristics of the genetic code.....	40
Skill 6.4	Analyzing types of mutations and their consequences.....	41
Skill 6.5	Demonstrating knowledge of extranuclear inheritance.....	42
Skill 6.6	Recognizing techniques used in the isolation, manipulation, and expression of genetic material.....	43
Skill 6.7	Recognizing applications of genetic engineering in medicine and agriculture	43
Skill 6.8	Demonstrating knowledge of ethical issues related to research in genetics and genetic engineering.....	45

COMPETENCY 7.0 UNDERSTAND PRINCIPLES OF TAXONOMY AND CLASSIFICATION IN BIOLOGY

Skill 7.1	Demonstrating knowledge of characteristics of biological classification and recognizing the procedures and criteria used to classify organisms.....	46
Skill 7.2	Demonstrating knowledge of the taxonomic relationships among organisms	47
Skill 7.3	Identifying distinguishing characteristics of taxonomic groups at the domain and kingdom levels.....	47
Skill 7.4	Demonstrating knowledge of the relationship between taxonomic classification and evolutionary history and identifying taxonomically useful traits and those that are not.....	49

TEACHER CERTIFICATION STUDY GUIDE

COMPETENCY 8.0 UNDERSTAND THE THEORY, EVIDENCE, AND MECHANISMS OF EVOLUTION

Skill 8.1	Recognizing the historical development and mechanisms of Darwinian evolutionary theory	51
Skill 8.2	Identifying sources of variation in a population on which natural selection can act	51
Skill 8.3	Analyzing the role of natural selection in leading to genotypic and phenotypic changes in a population over time	53
Skill 8.4	Demonstrating knowledge of population genetics, including factors that contribute to changing allele frequencies in a population	53
Skill 8.5	Demonstrating knowledge of factors that contribute to speciation	54
Skill 8.6	Analyzing evidence that species change over time.....	55

COMPETENCY 9.0 UNDERSTAND REPRODUCTION, DEVELOPMENT, AND LIFE CYCLES OF LIVING ORGANISMS

Skill 9.1	Demonstrating knowledge of the characteristics of sexual and asexual reproduction, including advantages and disadvantages of each	57
Skill 9.2	Recognizing processes related to developing embryos	57
Skill 9.3	Analyzing factors that affect the growth and development of organisms	58
Skill 9.4	Demonstrating knowledge of the life cycles of prokaryotes, plants, animals, and fungi	60

TEACHER CERTIFICATION STUDY GUIDE

COMPETENCY 10.0 UNDERSTAND THE STRUCTURES, ORGANIZATION, AND FUNCTIONS OF SYSTEMS IN ORGANISMS

Skill 10.1	Demonstrating knowledge of the anatomical structures, organ systems, and physiological processes that allow organisms to carry out specific life functions	63
Skill 10.2	Recognizing levels of biological organization in multicellular organisms	64
Skill 10.3	Analyzing characteristics, functions, and relationships of systems in animals.....	65
Skill 10.4	Analyzing characteristics, functions, and relationships of systems in plants	66

COMPETENCY 11.0 UNDERSTAND HOW ORGANISMS OBTAIN, STORE, AND USE MATTER AND ENERGY

Skill 11.1	Demonstrating knowledge of processes used by organisms to obtain energy	69
Skill 11.2	Demonstrating knowledge of ways in which animals obtain food and water	69
Skill 11.3	Demonstrating knowledge of ways in which plants obtain nutrients and water	70
Skill 11.4	Demonstrating knowledge of strategies used by organisms to store nutrients	71
Skill 11.5	Analyzing processes by which nutrients are obtained and distributed to all parts of an organism.....	71

TEACHER CERTIFICATION STUDY GUIDE

COMPETENCY 12.0 UNDERSTAND THE STRUCTURE AND FUNCTION OF THE HUMAN BODY

Skill 12.1	Demonstrating knowledge of the structures and processes of the human body	73
Skill 12.2	Analyzing systems involved in the regulation of physiological processes.....	82
Skill 12.3	Demonstrating knowledge of the tissues, organs, and systems that support and facilitate body movement.....	84
Skill 12.4	Analyzing the role of human body systems in supplying nutrition and oxygen to cells	84
Skill 12.5	Recognizing the characteristics of common diseases and disorders of the human body	85

COMPETENCY 13.0 UNDERSTAND POPULATIONS AND COMMUNITIES

Skill 13.1	Identifying the basic requirements of organisms for life	88
Skill 13.2	Niche	88
Skill 13.3	Analyzing basic characteristics of populations and interpreting population growth curves	90
Skill 13.4	Demonstrating knowledge of factors that affect population size and growth rates	91
Skill 13.5	Analyzing the relationships among organisms in a community	92

COMPETENCY 14.0 UNDERSTAND THE FLOW OF MATTER AND ENERGY THROUGH ECOSYSTEMS

Skill 14.1	Recognizing the characteristics of biogeochemical cycles in ecosystems and biomes.....	93
Skill 14.2	Analyzing the roles of organisms in biogeochemical cycles and the flow of matter through different types of ecosystems	94
Skill 14.3	Analyzing the types, sources, and flow of energy through different trophic levels	94

TEACHER CERTIFICATION STUDY GUIDE

COMPETENCY 15.0 UNDERSTAND TYPES AND CHARACTERISTICS OF ECOSYSTEMS AND BIOMES AND FACTORS AFFECTING THEIR CHANGE OVER TIME

Skill 15.1	Recognizing common patterns of interdependence and interrelationships among species in an ecosystem	97
Skill 15.2	Identifying the biotic and abiotic factors that affect an ecosystem	97
Skill 15.3	Recognizing types and characteristics of aquatic and terrestrial biomes and the types of flora and fauna in those biomes	98
Skill 15.4	Analyzing human effects on ecosystems	103
Skill 15.5	Recognizing processes and patterns of ecological succession.....	104
Skill 15.6	Recognizing the concept of limiting factors and the effects that they have on the productivity and complexity of different ecosystems	104

COMPETENCY 16.0 UNDERSTAND THE CHARACTERISTICS OF SCIENTIFIC KNOWLEDGE AND THE PROCESS OF SCIENTIFIC INQUIRY

Skill 16.1	Demonstrating knowledge of the nature, purpose, and characteristics of science and the limitations of science in terms of the kinds of questions that can be answered.....	106
Skill 16.2	Recognizing the difference between a scientific hypothesis and a scientific theory	107
Skill 16.3	Recognizing the dynamic nature of scientific knowledge through the continual testing and revision of hypotheses.....	107
Skill 16.4	Determining an appropriate scientific hypothesis or investigative design for addressing a given problem	107
Skill 16.5	Demonstrating knowledge of the principles and procedures for designing and carrying out scientific investigations.....	108
Skill 16.6	Recognizing the importance of and strategies for avoiding bias in scientific investigations.....	109
Skill 16.7	Demonstrating knowledge of the unifying concepts of science	109

TEACHER CERTIFICATION STUDY GUIDE

COMPETENCY 17.0 UNDERSTAND SCIENTIFIC TOOLS, INSTRUMENTS, MATERIALS, AND SAFETY PRACTICES

Skill 17.1	Recognizing procedures for the safe and proper use of scientific tools, instruments, chemicals, and other materials in investigations	111
Skill 17.2	Identifying appropriate units for measuring objects or substances	113
Skill 17.3	Identifying potential safety hazards associated with scientific equipment, materials, procedures, and settings.....	113
Skill 17.4	Recognizing appropriate protocols for maintaining safety and for responding to emergencies during classroom laboratory activities	114
Skill 17.5	Demonstrating knowledge of the role of models in science	115

COMPETENCY 18.0 UNDERSTAND THE SKILLS AND PROCEDURES FOR ANALYZING AND COMMUNICATING SCIENTIFIC DATA

Skill 18.1	Recognizing the concepts of precision, accuracy, and error and identifying potential sources of error in gathering and recording data	117
Skill 18.2	Applying appropriate mathematical concepts and computational skills to analyze data.....	118
Skill 18.3	Identifying methods and criteria for organizing data to aid in the analysis of data	118
Skill 18.4	Demonstrating knowledge of the use of data to support or challenge scientific arguments and claims	119
Skill 18.5	Identifying appropriate methods for communicating the outcomes of scientific investigations.....	119
Skill 18.6	Demonstrating familiarity with effective resources and strategies for reading to gain information about science-related topics and developing subject-area vocabulary.....	120
Sample Test		121
Answer Key		146
Rationales with Sample Questions		147
