

Table of Contents

SUBAREA I. SCIENTIFIC INQUIRY AND THE HISTORY AND NATURE OF SCIENCE

COMPETENCY 1.0 UNDERSTAND THE NATURE OF SCIENCE AND THE PROCESSES AND PRINCIPLES OF SCIENTIFIC INQUIRY 1

- Skill 1.1 Demonstrate an understanding of the nature, purpose, and distinguishing characteristics of science and limitations to the scope of science..... 1
- Skill 1.2 Recognize the importance of verifiable evidence and peer review in science and that scientific hypotheses are subject to experimental and observational confirmation 3
- Skill 1.3 Demonstrate knowledge of scientific methods, and apply principles and procedures for designing and conducting scientific investigations 3
- Skill 1.4 Identify the characteristics and uses of various types of scientific investigations and evaluate the appropriateness of a given investigative design for testing a particular hypothesis 5
- Skill 1.5 Identify sources of error or uncertainty in an investigation 6

COMPETENCY 2.0 UNDERSTAND PROCEDURES FOR GATHERING, RECORDING, ORGANIZING, INTERPRETING, ANALYZING, AND COMMUNICATING SCIENTIFIC DATA AND INFORMATION 7

- Skill 2.1 Use appropriate methods, tools, and technologies for gathering, recording, processing, analyzing, and evaluating data and for communicating the results of scientific investigations 7
- Skill 2.2 Select appropriate methods and criteria for organizing and displaying data..... 8
- Skill 2.3 Demonstrate an understanding of concepts of precision, accuracy, and error with regard to gathering and recording scientific data 9
- Skill 2.4 Demonstrate knowledge of the measurement units used in scientific investigations 9
- Skill 2.5 Identify and evaluate various sources of scientific information 10

TEACHER CERTIFICATION STUDY GUIDE

COMPETENCY 3.0	UNDERSTAND APPROPRIATE SAFETY PRACTICES, INCLUDING THE SELECTION AND PROPER USE OF MATERIALS, EQUIPMENT, AND TECHNOLOGIES IN SCIENTIFIC INVESTIGATIONS	11
Skill 3.1	Evaluate equipment, materials, procedures, and settings for potential safety hazards	11
Skill 3.2	Maintain safe practices and procedures in all areas related to science instruction	12
Skill 3.3	Respond to accidents by applying first-response procedures, including first aid	13
Skill 3.4	Identify sources of information about safety, legal issues, and the proper use, storage, and disposal of scientific materials	14
Skill 3.5	Demonstrate knowledge of the safe and proper use of science tools, equipment, chemicals, materials, and technology in scientific inquiry	16
Skill 3.6	Apply various procedures for using and caring for living organisms in an ethical and humane manner according to the standards of the National Association of Biology Teachers.....	17

TEACHER CERTIFICATION STUDY GUIDE

COMPETENCY 4.0 UNDERSTAND SHARED CONCEPTS, THEMES, AND METHODS AMONG SCIENTIFIC AND OTHER DISCIPLINES AND THE INTERDEPENDENCE OF SCIENCE AND TECHNOLOGY 18

- Skill 4.1 Identify common scientific concepts and themes that link and unify science fields 18
- Skill 4.2 Demonstrate knowledge of the general characteristics and properties of systems and how system components and different systems interact..... 19
- Skill 4.3 Demonstrate an understanding of how models are used in science and methods for evaluating the strengths and weaknesses of scientific models 20
- Skill 4.4 Analyze the interrelationships among science and other disciplines 21
- Skill 4.5 Identify concepts and methods that are common to science and technology and analyze the interdependence of science and technology 22

COMPETENCY 5.0 UNDERSTAND THE HISTORY OF SCIENCE AND THE INTERRELATIONSHIPS OF SCIENCE AND SOCIETY..... 24

- Skill 5.1 Identify key events in the history of science and the science contributions of people from a variety of social and ethnic backgrounds 24
- Skill 5.2 Demonstrate an understanding of the influence of social and cultural factors on science and Technology 25
- Skill 5.3 Demonstrate the ability to discriminate between the ethical and unethical uses of science..... 28
- Skill 5.4 Identify the effects of scientific and technological developments on the environment, human biology, society, and culture 29
- Skill 5.6 Identify careers in science and evaluate reasons why people choose science as a career..... 32

TEACHER CERTIFICATION STUDY GUIDE

SUBAREA II.

LIFE SCIENCE

COMPETENCY 6.0 UNDERSTAND BASIC CONCEPTS OF CELL BIOLOGY..... 35

- Skill 6.1 Identify characteristics and functions of biologically important compounds 35
- Skill 6.2 Demonstrate knowledge of the structure and function of the parts of a cell and cellular organelles..... 39
- Skill 6.3 Demonstrate an understanding of processes by which cells transport materials across cell membranes 42
- Skill 6.4 Compare and contrast viruses and cells, prokaryote and eukaryote cells, and plant and animal cells 44
- Skill 6.5 Demonstrate an understanding of the cell cycle and the role of cell division, growth, and differentiation in the development of living organisms 47
- Skill 6.6 Demonstrate knowledge of cellular responses to environmental stimuli..... 49

COMPETENCY 7.0 UNDERSTAND THE STRUCTURE, ORGANIZATION, AND BASIC LIFE FUNCTIONS OF ORGANISMS..... 51

- Skill 7.1 Demonstrate knowledge of the levels of organization in organisms and the relationship of organs and organ systems to each other and to the organism as a whole 51
- Skill 7.2 Analyze the relationship between structure and function in different systems for various types of organisms 52
- Skill 7.3 Compare and contrast how various animals and plants carry out basic life processes 53
- Skill 7.4 Compare and contrast sources of energy and matter for different organisms and how various organisms obtain, store, and use energy and matter..... 55
- Skill 7.4 Categorize organisms based on methods of reproduction and offspring development 57
- Skill 7.6 Analyze behavioral responses to external and internal stimuli in a variety of organisms..... 57

TEACHER CERTIFICATION STUDY GUIDE

COMPETENCY 8.0	UNDERSTAND THE BASIC PRINCIPLES OF GENETICS AND EVOLUTION	59
Skill 8.1	Relate the structure and behavior of chromosomes during meiosis to hereditary patterns.....	59
Skill 8.2	Demonstrate knowledge of the principles of inheritance and apply probability methods to determine genotype and phenotype frequencies	60
Skill 8.3	Identify sources of variation in populations	64
Skill 8.4	Demonstrate an understanding of the roles of variation, natural selection, and reproductive isolation in adaptation and speciation	64
Skill 8.5	Identify evidence for evolutionary change in organisms over time.....	66
COMPETENCY 9.0	UNDERSTAND HUMAN BIOLOGY, INCLUDING THE INTERACTIONS OF HUMANS WITH THE ENVIRONMENT	70
Skill 9.1	Demonstrate knowledge of human anatomy and physiology and how humans meet their basic needs.....	70
Skill 9.2	Identify responsible health practices, including issues relating to nutrition and exercise.....	77
Skill 9.3	Analyze the global impact humans have on living and nonliving environments, including issues related to overpopulation.....	77
Skill 9.4	Analyze the relationships among renewable and nonrenewable resources and the human population.....	79

TEACHER CERTIFICATION STUDY GUIDE

COMPETENCY 10.0 UNDERSTAND INTERACTIONS OF ORGANISMS WITH ONE ANOTHER AND THEIR ENVIRONMENTS	80
Skill 10.1 Identify characteristics of populations, communities, ecosystems, and biomes	80
Skill 10.2 Demonstrate an understanding of the interactions of living and nonliving components of ecosystems and of limiting factors that regulate productivity, complexity, and population sizes within ecosystems	81
Skill 10.3 Demonstrate an understanding of the concepts of niche and carrying capacity.....	82
Skill 10.4 Analyze the roles of organisms within an ecosystem and the interrelationships among organisms in ecosystems.....	84
Skill 10.5 Analyze the flow of energy and the features of food chains and food webs in various types of ecosystems.....	85

TEACHER CERTIFICATION STUDY GUIDE

SUBAREA III.

PHYSICAL SCIENCE

COMPETENCY 11.0 UNDERSTAND THE PROPERTIES OF MATTER..... 87

Skill 11.1 Demonstrate knowledge of the atomic and subatomic structure of matter..... 87

Skill 11.2 Compare and contrast the characteristics of atoms, elements, molecules, and compounds 89

Skill 11.3 Identify the physical and chemical properties of elements and compounds 90

Skill 11.4 Interpret chemical symbols, formulas, and expressions 91

COMPETENCY 12.0 UNDERSTAND PHYSICAL AND CHEMICAL CHANGES IN MATTER 94

Skill 12.1 Identify types and characteristics of physical and chemical changes in matter and factors that cause these changes 94

Skill 12.2 Apply the concept of conservation of matter..... 95

Skill 12.3 Identify characteristics of various states of matter and the energy changes associated with changes in state..... 95

Skill 12.4 Demonstrate an understanding of the predictable nature of chemical reactions 96

Skill 12.5 Analyze how concentration, pressure, temperature, and catalysts affect chemical reactions 97

Skill 12.6 Demonstrate an understanding of the use of symbolic equations to represent chemical changes and reactions..... 98

TEACHER CERTIFICATION STUDY GUIDE

COMPETENCY 13.0 UNDERSTAND CONCEPTS RELATED TO ENERGY AND ENERGY TRANSFORMATION 99

- Skill 13.1 Demonstrate knowledge of the forms of energy and their characteristics..... 99
- Skill 13.2 Analyze the relationship between energy and matter and the ways in which they interact 101
- Skill 13.3 Demonstrate a basic understanding of the laws of thermodynamics and the processes of heat transfer 102
- Skill 13.4 Demonstrate an understanding of energy transfer in physical systems..... 103
- Skill 13.5 Apply the kinetic molecular model to explain the behavior of solids, liquids, and gases and to explain what happens during chemical reactions 104

COMPETENCY 14.0 UNDERSTAND ELECTRICITY, MAGNETS, AND ELECTROMAGNETISM AND THEIR ASSOCIATED FIELDS..... 105

- Skill 14.1 Analyze the characteristics of static electricity and electric fields 105
- Skill 14.2 Demonstrate an understanding of properties of electricity..... 106
- Skill 14.3 Interpret simple electrical circuits and their characteristics..... 106
- Skill 14.4 Analyze the characteristics of magnets and magnetic fields 107
- Skill 14.5 Demonstrate an understanding of the principles of electromagnetism 108
- Skill 14.6 Use the principles of electromagnetism to explain the operation of electric motors, generators, and transformers 108

TEACHER CERTIFICATION STUDY GUIDE

COMPETENCY 15.0 UNDERSTAND FORCES AND MOTION 110

Skill 15.1 Compare and contrast types and characteristics of forces and how they affect the physical world..... 110

Skill 15.2 Analyze the motion of objects and the effects of forces on objects 111

Skill 15.3 Demonstrate an understanding of Newton's laws of motion and apply Newton's laws to a variety of practical problems..... 113

Skill 15.4 Demonstrate an understanding of the relationships of mass, force, motion, time, and position 115

Skill 15.5 Compare and contrast characteristics of force, work, and power, and types and characteristics of simple machines 116

COMPETENCY 16.0 UNDERSTAND CHARACTERISTICS AND BEHAVIOR OF WAVES, SOUND, AND LIGHT 117

Skill 16.1 Identify types and characteristics of waves and their effects on properties of sound and light..... 117

Skill 16.2 Compare and contrast the behavior of sound and light waves in various media and substances 118

Skill 16.3 Analyze the behavior of light under various conditions..... 118

Skill 16.4 Demonstrate knowledge of phenomena related to sound and light 120

TEACHER CERTIFICATION STUDY GUIDE

SUBAREA IV.

EARTH AND SPACE SCIENCE

COMPETENCY 17.0 UNDERSTAND THE STRUCTURE AND COMPOSITION OF EARTH AND THE NATURAL PROCESSES THAT SHAPE IT 121

Skill 17.1 Demonstrate knowledge of the composition and structure of Earth's interior, and sources and flow of energy in Earth's interior 121

Skill 17.2 Identify the physical and chemical properties of the lithosphere and analyze characteristics and processes of the rock cycle..... 122

Skill 17.3 Identify major features of Earth's surface and analyze processes that produce changes in these features 124

Skill 17.4 Demonstrate knowledge of how fossils form and how fossils provide evidence of complexity and diversity over time 131

Skill 17.5 Demonstrate knowledge of methods and techniques for locating points and features on Earth's surface 132

COMPETENCY 18.0 UNDERSTAND CHARACTERISTICS OF THE ATMOSPHERE, WEATHER, AND CLIMATE 134

Skill 18.1 Demonstrate knowledge of the basic composition, properties, structure, and evolution of the atmosphere..... 134

Skill 18.2 Demonstrate an understanding of the patterns of energy transfer in the atmosphere..... 135

Skill 18.3 Identify types and characteristics of clouds and the processes of cloud formation and Precipitation 135

Skill 18.4 Analyze characteristics of large-scale and local weather systems and the causes and effects of severe weather events 136

Skill 18.5 Identify the characteristics and distribution of Earth's major climatic zones and the factors that affect local and global weather and climate 138

Skill 18.6 Identify methods, techniques, tools, and technology used in observing, measuring, and recording weather conditions and in making short-term and long-term predictions about weather and climate 140

TEACHER CERTIFICATION STUDY GUIDE

**COMPETENCY 19.0 UNDERSTAND CHARACTERISTICS OF THE
HYDROSPHERE AND THE MOVEMENT OF WATER IN
THE ENVIRONMENT 141**

- Skill 19.1 Demonstrate an understanding of the properties and behavior of water in various states 141
- Skill 19.2 Identify major categories, characteristics, and distribution of hydrologic systems on Earth 141
- Skill 19.3 Analyze patterns and processes of water circulation through the environment 142
- Skill 19.4 Identify characteristics of watersheds and aquifers and the effects of natural events and human activities on watersheds and aquifers 143
- Skill 19.5 Analyze the composition and physical characteristics of oceans 144
- Skill 19.6 Demonstrate an understanding of the causes and effects of waves and tides, and analyze patterns of ocean circulation and their effects on weather and climate 146

**COMPETENCY 20.0 UNDERSTAND INTERACTIONS AMONG EARTH'S
SYSTEMS AND CONCEPTS RELATED TO
ENVIRONMENTAL SCIENCE 147**

- Skill 20.1 Analyze interactions among Earth's lithosphere, hydrosphere, atmosphere, and biosphere and how natural events affect and are affected by these interactions 147
- Skill 20.2 Identify types of natural resources and the consequences of various uses of Earth's natural resources 148
- Skill 20.3 Analyze various strategies for dealing with environmental problems and resource depletion 150

TEACHER CERTIFICATION STUDY GUIDE

COMPETENCY 21.0 UNDERSTAND CHARACTERISTICS OF THE SOLAR SYSTEM AND UNIVERSE AND THE METHODS OF EXPLORING THEM 151

Skill 21.1 Identify characteristics and interactions of the major components of the solar system..... 151

Skill 21.2 Analyze the effects of the positions, movements, and interactions of the Sun, Earth, and Moon 154

Skill 21.3 Demonstrate knowledge of the types and characteristics of celestial objects 156

Skill 21.4 Demonstrate an understanding of various scientific theories of the origin of the solar system and universe..... 157

Skill 21.4 Interpret simple data derived from remote and direct observations of the solar system and universe 158

Skill 21.5 Demonstrate knowledge of human space exploration programs, methods and technology used to gather data about space, and benefits to society of technological advances associated with space exploration 159

Sample Test..... 162

Answer Key 188

Rationales with Sample Questions 189
