

TABLE OF CONTENTS

COMPETENCY #		PG #
DOMAIN I. NUMBER CONCEPTS..... 1		
Competency 001	The teacher understands the structure of number systems, the development of a sense of quantity, and the relationship between quantity and symbolic representations.....	1
Competency 002	The teacher understands number operations and computational algorithms.....	12
Competency 003	The teacher understands ideas of number theory and uses numbers to model and solve problems within and outside of mathematics.....	21
DOMAIN II. PATTERNS AND ALGEBRA..... 27		
Competency 004	The teacher understands and uses mathematical reasoning to identify, extend, and analyze patterns and understands the relationships among variable, expressions, equations, inequalities, relations, and functions.....	27
Competency 005	The teacher understands and uses linear functions to model and solve problems	34
Competency 006	The teacher understands and uses nonlinear functions and relations to model and solve problems	43
Competency 007	The teacher uses and understands the conceptual foundations of calculus related to topics in middle school mathematics	67
DOMAIN III. GEOMETRY AND MEASUREMENT 76		
Competency 008	The teacher understands measurement as a process	76
Competency 009	The teacher understands the geometric relationships and axiomatic structure of Euclidian geometry	84
Competency 010	The teacher analyzes the properties of two- and three-dimensional figures	95
Competency 011	The teacher understands transformational geometry and related algebra to geometry and trigonometry using the Cartesian coordinate system.....	104

DOMAIN IV. PROBABILITY AND STATISTICS 112

Competency 012 The teacher understands how to use graphical and numerical techniques to explore data, characterize patterns, and describe departures from patterns..... 112

Competency 013 The teacher understands the theory of probability 120

Competency 014 The teacher understands the relationship among probability theory, sampling, and statistical inference, and how statistical inference is used in making and evaluating predictions 129

DOMAIN V. MATHEMATICAL PROCESSES AND PERSPECTIVES..... 134

Competency 015 The teacher understands mathematical reasoning and problem solving 134

Competency 016 The teacher understands mathematical connections within and outside of mathematics and how to communicate mathematical ideas and concepts 137

DOMAIN VI. MATHEMATICAL LEARNING, INSTRUCTION, AND ASSESSMENT 140

Competency 017 The teacher understands how children learn and develop mathematical skills, procedures, and concepts 140

Competency 018 The teacher understands how to plan, organize, and implement instruction using knowledge of students, subject matter, and statewide curriculum (Texas Essential Knowledge and Skills [TEKS]) to teach all students to use mathematics..... 143

Competency 019 The teacher understands assessment and uses a variety of formal and informal assessment techniques to monitor and guide mathematics instruction and to evaluate student progress 147

ANSWER KEY TO PRACTICE PROBLEMS	150
ESSENTIAL TIPS FOR EVERY MATH TEACHER.....	152
WEB LINKS.....	160
SAMPLE TEST	164
ANSWER KEY.....	192
RIGOR TABLE	193
RATIONALES FOR SAMPLE QUESTIONS	194
