TABLE OF CONTENTS

Introduction..................................................................................................................................................xiii

COMPETENCY 1.0 KNOWLEDGE OF FOUNDATIONS OF EXCEPTIONAL STUDENT EDUCATION.................................................................1

Skill 1.1 Identify state and federal legislation and case law that have affected the education of students with disabilities.......................................................... 1

Skill 1.2 Identify appropriate practices based on legal and ethical standards (e.g., due process, procedural safeguards, confidentiality, access to general education, least restrictive environment, transition planning, free appropriate public education) ........................................................................................................ 12

Skill 1.3 Demonstrate knowledge of the required processes for developing Individual Educational Plans (IEPs), Individualized Family Service Plans (IFSPs), and Transition IEPs ................................................................................................................................. 18

Skill 1.4 Identify the classification systems and eligibility criteria under the current Individuals with Disabilities Education Act................................................................. 22

Skill 1.5 Compare the development and characteristics (e.g., language, cognitive-academic, social-emotional, sensory, physical-motor) of children with disabilities to the development and characteristics of children without disabilities........................................................................................................... 25

Skill 1.6 Interpret curriculum information and assessment data for IEP and Child Study Team members................................................................................................................................. 36

Skill 1.7 Identify models of support for providing assistance in general education curricula................................................................................................................................. 41

Skill 1.8 Identify the purposes and functions of professional and advocacy organizations relevant to educating students with disabilities......................... 45

COMPETENCY 2.0 KNOWLEDGE OF ASSESSMENT AND EVALUATION ..................................................................................................................55

Skill 2.1 Identify the purposes of assessment (e.g., early identification, screening, interventions, eligibility, diagnosis, identification of relevant instructional content, monitoring the effectiveness of instruction) across disciplines........55
Skill 2.2 Identify the legal requirements and ethical principles regarding the assessment of students with disabilities (e.g., confidentiality, adherence to test protocols, appropriateness of assessment for student needs) ...............57

Skill 2.3 Identify measurement concepts, characteristics, and uses of norm-referenced, criterion-referenced, and performance-based assessments for students with disabilities ................................................................. 59

Skill 2.4 Interpret, analyze, and apply the results of norm-referenced, criterion-referenced, and performance-based assessments for students with disabilities ................................................................. 63

Skill 2.5 Identify alternate assessment strategies and procedures (e.g. observations, performance-based assessments, ecological assessments, interviews, portfolios) and their appropriate use. ............................................. 68

Skill 2.6 Identify the factors that influence disproportionate representation of students from diverse cultural, linguistic, and socioeconomic backgrounds in programs for students with disabilities and recognize the implications for assessment ................................................................. 72

Skill 2.7 Identify and analyze reliable and valid progress-monitoring methods for assessing individual student progress (e.g., curriculum-based assessments, fluency checks, rubrics, story retelling, informal reading inventories, portfolios). ................................................................. 74

COMPETENCY 3.0 KNOWLEDGE OF INSTRUCTIONAL PRACTICES IN EXCEPTIONAL STUDENT EDUCATION ......................... 80

Skill 3.1 Analyze assessment information to identify a student’s educational needs and instructional levels, to select appropriate specialized techniques, strategies, and materials ................................................................. 80

Skill 3.2 Identify characteristics of reliable sources of scientifically based research related to instructional practices. ................................................................. 83

Skill 3.3 Identify instructional strategies for acquisition, generalization, and maintenance of skills (e.g., functional and applied academic skills, workplace and career skills, independent living skills) across real-life situations at school, at home, and in the community ................................................. 87

Skill 3.4 Select relevant general education and special skills curricula appropriate for a given student’s age, instructional needs, and functional performance across settings ................................................................................. 89
**Skill 3.5** Identify methods for differentiating, accommodating, and modifying assessment, instruction, and materials to meet individual student needs (e.g., related to age, gender, cultural and linguistic background, preferred communication mode)................................................................. 91

**Skill 3.6** Identify effective methods of communication, consultation, and collaboration with students, families, parents, guardians, administrators, general education teachers, paraprofessionals, and other professionals, including students, families, and team members from culturally and linguistically diverse background, as equal members of the education team ........................................................................................................ 98

**Skill 3.7** Identify effective classroom management and flexible grouping strategies for specific instructional activities ................................................................................................. 102

**Skill 3.8** Identify effective instructional methods (e.g., explicit and systematic instruction, scaffolding, modeling) for integrating reading, writing, speaking, listening, viewing, researching, and presenting across curricula 106

**Skill 3.9** Identify instructional strategies that help students comprehend and apply knowledge of informational text structure (e.g., cause and effect, chronological order, compare and contrast) and text features (e.g., index, glossary, subheading) .................................................................................................................. 110

**Skill 3.10** Identify criteria for selecting and evaluating both print and nonprint media (e.g., Internet, software, trade books, textbooks, DVDs, videos) for instructional use to match student needs and interests .................................................................................................................. 114

**Skill 3.11** Identify effective instructional methods and supports for teaching mathematics and integrating mathematics across the curricula ............................................................... 121

**COMPETENCY 4.0 KNOWLEDGE OF ASSESSING, DESIGNING AND IMPLEMENTING POSITIVE BEHAVIORAL SUPPORTS ..128**

**Skill 4.1** Analyze the legal and ethical issues pertaining to positive behavior management strategies and disciplinary actions .................................................................................................. 128

**Skill 4.2** Identify data collection strategies for assessing student behavior ........................................... 130

**Skill 4.3** Analyze individual and group data to select and evaluate proactive interventions that foster appropriate behavior ...................................................................................................... 131

**Skill 4.4** Identify and interpret the essential elements of a functional behavior assessment and a behavior intervention plan ............................................................................................................. 133

### COMPETENCY 5.0 KNOWLEDGE OF LANGUAGE DEVELOPMENT AND COMMUNICATION SKILLS

- **Skill 5.1** Identify the sequence of expressive and receptive language development and the components of language structure. | 136 |
- **Skill 5.2** Identify communication deficits and select appropriate interventions. | 141 |
- **Skill 5.3** Select strategies for integrating communication instruction to meet individual student needs across educational settings. | 145 |
- **Skill 5.4** Select appropriate assistive technology and alternative communication systems to facilitate communication. | 148 |
- **Skill 5.5** Identify the sequence of typical reading development (e.g., prereading level, learning to read, reading to learn) and critical components of reading development (e.g., phonological awareness, phonics, fluency, vocabulary, comprehension). | 151 |
- **Skill 5.6** Identify the terminology and concepts of literacy development (e.g., oral language, phonological awareness, concepts about print, alphabet knowledge, decoding, vocabulary, text structures, written language, motivation). | 153 |
- **Skill 5.7** Identify the characteristics and purposes of various reading programs (e.g., core reading program, supplemental reading program, intensive intervention program). | 156 |
- **Skill 5.8** Identify characteristics of reading difficulties. | 158 |
- **Skill 5.9** Identify and select prevention and intervention methods for addressing reading difficulties. | 162 |
- **Skill 5.10** Identify the early phases of word recognition within the decoding process (e.g., pre-alphabetic, partial alphabetic, full-alphabetic, consolidated alphabetic). | 164 |
- **Skill 5.11** Identify explicit and systematic instructional methods for promoting the development of phonological and phonemic awareness. | 166 |
- **Skill 5.12** Identify the processes and skills (e.g., graphophonemic, morphemic, syntactic, semantic) that effective readers use for word recognition. | 170 |
Skill 5.13 Identify explicit and systematic instructional methods for developing reading fluency (e.g., practice with high-frequency words, timed readings, repeated readings, read alouds, choral reading, recorded books) ...................... 176

Skill 5.14 Identify explicit and systematic instructional methods and strategies for increasing vocabulary acquisition (e.g., appropriate choice of words for instruction; multiple exposures; teaching word learning strategies, such as word analysis and contextual analysis) ............................................... 179

Skill 5.15 Identify explicit and systematic instructional methods and strategies for facilitating students’ reading comprehension and critical thinking skills (e.g., use of graphic and semantic organizers; use of multiple strategy instruction; teaching summarizing, monitoring comprehension, question answering, question generating, and recognizing story structure as comprehension strategies) .............................................. 190

Skill 5.16 Identify explicit and systematic instructional methods for developing phonics skills .......................................................................................................................... 197

COMPETENCY 6.0 KNOWLEDGE OF SKILLS RELATED TO TEACHING INTERPERSONAL INTERACTIONS AND PARTICIPATION .............................................................. 201

Skill 6.1 Select appropriate instructional procedures for teaching adaptive life skills based on observations, ecological assessments, family interviews, and other student information ......................................................... 201

Skill 6.2 Identify methods for evaluating and documenting student progress in acquiring, generalizing, and maintaining skills related to interpersonal interactions and participation in activities across settings (e.g., at school, at home, in the community) ........................................................................................................ 203

Skill 6.3 Identify skills necessary for students with disabilities to engage in self-determination and self-advocacy. ................................................................. 204

COMPETENCY 7.0 KNOWLEDGE OF THE TRANSITION PROCESS ................. 206

Skill 7.1 Identify activities relevant to the four stages of career development (i.e., awareness, exploration, preparation, and placement) ................................. 206

Skill 7.2 Identify the essential domains of transition planning (e.g., personal-social, general community functioning, employment, leisure-recreational) for students with disabilities ......................................................... 207

Skill 7.3 Demonstrate knowledge of transition planning using student and family characteristics (e.g., socioeconomic status, gender, cultural and linguistic background) to develop desired post school outcomes ........................................ 208
Skill 7.4 Identify resources and strategies to assist students in functioning effectively in a variety of environments to which they will be transitioning...

Sample Test.................................................................213
