

Table of Contents

COMPETENCY 1

KNOWLEDGE OF ALGEBRA 1

SKILL 1.1: Apply the properties of real numbers: closure, commutative, associative, distributive, transitive, identities, and inverses.....	3
SKILL 1.2: Solve linear equations and inequalities in one or two variables, symbolically or graphically	4
SKILL 1.3: Relate the graphical and algebraic representations of linear equations or inequalities on a number line or in the coordinate plane	6
SKILL 1.4: Determine the slope, intercepts, or equation of a line, given appropriate information	9
SKILL 1.5: Formulate and solve systems of linear equations or inequalities, including models of real-world situations.....	11
SKILL 1.6: Solve equations or inequalities involving absolute value	19
SKILL 1.7: Solve or identify models of real-world problems involving ratio and proportion or involving direct, inverse, and joint variations.....	21
SKILL 1.8: Solve or identify equations containing rational or radical expressions, including models of real-world situations	23
SKILL 1.9: Solve quadratic equations (including those with complex solutions) using factoring, graphing, completing the square, and applying the quadratic formula.....	26
SKILL 1.10: Solve or identify models of real-world problems using quadratic equations	29

COMPETENCY 2

KNOWLEDGE OF ADVANCED ALGEBRA 33

SKILL 2.1: Relate graphical and algebraic representations of nonlinear inequalities.....	35
SKILL 2.2: Perform arithmetic operations of complex numbers algebraically or geometrically.....	35
SKILL 2.3: Solve equations involving radicals (index greater than 2), powers, exponents, and logarithms	38
SKILL 2.4: Solve polynomial equations (third-degree or higher).....	41
SKILL 2.5: Expand binomials to a positive integral power or determine a specified term of an expansion.....	45
SKILL 2.6: Perform and model vector addition, subtraction, and scalar multiplication on the plane.....	46
SKILL 2.7: Determine a specified term or rule for an arithmetic or geometric sequence	48
SKILL 2.8: Determine the sum of terms in an arithmetic or geometric sequence	49
SKILL 2.9: Perform operations on matrices	50
SKILL 2.10: Solve and interpret models of real-world problems using discrete structures (e.g., sequences, finite graphs, matrices)	55

COMPETENCY 3

KNOWLEDGE OF FUNCTIONS 57

SKILL 3.1: Determine which relations are functions, given mappings, sets of ordered pairs, rules, and graphs	59
SKILL 3.2: Determine the domain and range of a given function	60
SKILL 3.3: Relate graphs and equations of functions (e.g., absolute value, step, piecewise, polynomial, exponential, periodic)	62
SKILL 3.4: Determine the inverse of a given function or the composition of two functions and their related properties	70
SKILL 3.5: Determine or prove whether a function is symmetric, periodic, or even/odd	72
SKILL 3.6: Determine the graph or equation of a transformed function	73

COMPETENCY 4

KNOWLEDGE OF GEOMETRY 75

SKILL 4.1: Identify or apply the <i>relation</i> between the <i>perimeter</i> , <i>area</i> , or <i>volume</i> of similar figures	77
SKILL 4.2: Determine the <i>relationship</i> among points, lines, and planes, including the intersections with other two- and three-dimensional figures	79
SKILL 4.3: Differentiate and relate geometric figures and solids according to their properties	80
SKILL 4.4: Derive or apply formulas to find the measures of interior and exterior angles of convex polygons, including their sums	83
SKILL 4.5: Prove or apply properties of quadrilaterals, including models of real-world situations	84
SKILL 4.6: Prove theorems or solve problems with similar or congruent polygons or solids	86
SKILL 4.7: Apply the Pythagorean theorem or its converse, including models of real-world situations	91
SKILL 4.8: Apply 30° - 60° - 90° or 45° - 45° - 90° triangle relationships to solve problems	92
SKILL 4.9: Derive or apply formulas for the perimeter, circumference, or area of two-dimensional figures (e.g., circles, sectors, segments, arc lengths, polygons, composite figures)	94
SKILL 4.10: Apply theorems pertaining to the relationships of chords, secants, diameters, radii, and tangents with respect to circles and to each other	98
SKILL 4.11: Prove or apply theorems pertaining to the measures of inscribed angles and angles formed by chords, secants, and tangents	101
SKILL 4.12: Analyze basic geometric constructions (e.g., bisecting angles or line segments, constructing parallels and perpendiculars)	102
SKILL 4.13: Derive or apply formulas for surface area and volume of prisms, pyramids, cylinders, cones, and spheres	107

COMPETENCY 5

KNOWLEDGE OF COORDINATE GEOMETRY 111

SKILL 5.1: Apply distance or midpoint formulas involving two points, a point and a line, or two parallel lines.....	113
SKILL 5.2: Determine the equations or graphs of parabolas, ellipses, and hyperbolas, and their directrices, foci, vertices, axes, and asymptotes, given appropriate information.....	116
SKILL 5.3: Determine the equation, graph, center, or radius of a circle, given appropriate information.....	120
SKILL 5.4: Determine the images of geometric objects on a coordinate plane under translations, rotations, dilations, or reflections, and analyze appropriate properties of images and preimages.....	122
SKILL 5.5: Determine the equation of a conic section to model real-world situations	127

COMPETENCY 6

KNOWLEDGE OF TRIGONOMETRY 129

SKILL 6.1: Determine equations of graphs of circular/trigonometric functions and their inverses	131
SKILL 6.2: Prove circular/trigonometric function identities or apply them to solve problems	132
SKILL 6.3: Analyze the graphs of trigonometric functions (e.g., amplitude, period, phase shift)	134
SKILL 6.4: Solve real-world problems involving triangles using the law of sines or the law of cosines	138
SKILL 6.5: Apply trigonometric ratios to solve right triangle problems	141
SKILL 6.6: Determine an equation to model a real-world periodic phenomenon	142

COMPETENCY 7

KNOWLEDGE OF STATISTICS AND PROBABILITY..... 145

SKILL 7.1: Interpret data on a single categorical or quantitative variable (e.g., measures of central tendency, spread, location)	147
SKILL 7.2: Interpret data on two categorical or quantitative variables (e.g., correlation, linear regression, two-way tables) or identify an appropriate representation	150
SKILL 7.3: Interpret information from bar graphs, histograms, circle graphs, stem-and-leaf plots, scatter plots, and box-and-whisker graphs, or identify an appropriate representation for given data.....	154
SKILL 7.4: Identify the processes used to design and conduct statistical experiments, including possible sources of bias	158
SKILL 7.5: Infer and justify conclusions from sample surveys, experimental data, and observational studies	160
SKILL 7.6: Solve problems using the fundamental counting principle, permutations, and combinations	162
SKILL 7.7: Determine probabilities of independent, dependent (i.e., conditional), or compound events using a variety of procedures (e.g., counting procedures, tables, sample spaces, tree diagrams, permutations, combinations).....	164
SKILL 7.8: Use probability to evaluate outcomes of decisions, including the use of expected value.....	167

COMPETENCY 8

KNOWLEDGE OF CALCULUS 171

SKILL 8.1: Determine limits using theorems concerning sums, products, and quotients of functions	173
SKILL 8.2: Determine the derivatives of algebraic, trigonometric, exponential, and logarithmic functions	175
SKILL 8.3: Determine the derivative of the sum, product, quotient, or composition of functions.....	178
SKILL 8.4: Determine the slope or equation of a tangent line to a curve at a point	180
SKILL 8.5: Use the first derivative of a given function in various representations to determine increasing and decreasing intervals or extrema	183
SKILL 8.6: Use the second derivative of a given function in various representations to determine intervals of concavity or points of inflection	185
SKILL 8.7: Solve problems using velocity and acceleration	187
SKILL 8.8: Solve problems using instantaneous rates of change and related rates of change	188
SKILL 8.9: Determine antiderivatives of algebraic, trigonometric, exponential, and logarithmic functions	190
SKILL 8.10: Solve distance, area, and volume problems using integration	192
SKILL 8.11: Relate functions and their derivatives through the use of graphs or tables	197

COMPETENCY 9

KNOWLEDGE OF MATHEMATICAL REASONING 201

SKILL 9.1: Evaluate arguments or conjectures using laws of logic or counterexamples.....	203
SKILL 9.2: Identify or compare the converse, inverse, and contrapositive of a conditional statement.....	206
SKILL 9.3: Analyze mathematical assertions within proofs (e.g., direct, indirect, mathematical induction, algebraic).....	208
SKILL 9.4: Classify examples of reasoning as inductive or deductive	210

COMPETENCY 10

KNOWLEDGE OF INSTRUCTION AND ASSESSMENT 211

SKILL 10.1: Analyze students' misconceptions and choose instructional approaches to address the misconceptions, with particular focus on number operations, algebra, advanced algebra, functions, and geometry	213
SKILL 10.2: Identify or evaluate diagnostic, formative, or summative assessment items that measure conceptual or procedural understanding.....	214
SKILL 10.3: Determine the appropriate sequence of lessons for a specific mathematical concept.....	215
SKILL 10.4: Evaluate student responses to identify misconceptions or gaps in knowledge and provide specific feedback to promote student achievement, including the use of a rubric	216
SKILL 10.5: Analyze a given instructional segment, which may include the selection or use of available tools and resources (e.g., mathematical models, manipulatives, dynamic grapher, interactive geometry drawing tool, computer algebra system, appropriate calculator)	217
SKILL 10.6: Develop and interpret appropriate models for mathematical concepts, including real-world models and equivalent representations (e.g., graphical, symbolic, verbal, numeric)	217

SKILL 10.7: Identify or apply methods, strategies, and questioning techniques for teaching problem-solving skills and applications (e.g., constructing tables from given data, guess-and-check, working backward, reasonableness, estimation).....218

SKILL 10.8: Differentiate among various learning environments, including alternative methods of assessment (e.g., performance, portfolios, projects) to accommodate the needs and diversity of students219
