

TEACHER CERTIFICATION EXAM

TABLE OF CONTENTS

COMPETENCIES	PG #
SUBAREA I—MATHEMATICAL PROCESSES AND NUMBER SENSE	1
0001 Understand mathematical problem solving and the connections between and among the fields of mathematics and other disciplines	1
0002 Understand and communicate mathematical concepts and symbols	6
0003 Understand the principles and processes of mathematical reasoning.....	14
0004 Understand number theory and principles and properties of the real and complex number systems.....	18
SUBAREA II—RELATIONS, FUNCTIONS, AND ALGEBRA.....	32
0005 Understand the principles and properties of algebraic relations and functions	32
0006 Understand the principles and properties of linear algebra	43
0007 Understand the properties of linear functions and relations.....	51
0008 Understand the properties of quadratic and higher-order polynomial relations and functions.....	72
0009 Understand the principles and properties of rational, radical, piecewise, and absolute value functions	99
SUBAREA III—MEASUREMENT AND GEOMETRY	119
00010 Understand the principles and properties of exponential and logarithmic functions.....	119
00011 Understand principles and procedures related to measurement	123
00012 Understand the principles and properties of Euclidean geometry in two and three dimensions.....	143
00013 Understand the principles and properties of coordinate geometry	166
00014 Understand the principles and properties of vector and transformational geometries	174

TEACHER CERTIFICATION EXAM

SUBAREA IV—TRIGONOMETRY AND CALCULUS.....	181
00015 Understand the principles and properties of and relationships involving trigonometric functions and their graphic representations ..	181
00016 Understand and apply the principles and techniques of trigonometry to model and solve problems.....	189
00017 Understand the principles and properties of limits, continuity, and average rates of change.....	195
00018 Understand and apply the principles and techniques of differential calculus	202
00019 Understand and apply the principles and techniques of integral calculus	220
SUBAREA V—PROBABILITY, STATISTICS, AND DISCRETE MATHEMATICS	236
00020 Understand the principles, properties, and techniques of probability	236
00021 Understand the principles, properties, and techniques of statistics ...	245
00022 Understand the principles of discrete mathematics	255
CURRICULUM AND INSTRUCTION	261
ANSWER KEY TO PRACTICE PROBLEMS	267
SAMPLE TEST.....	273
ANSWER KEY.....	285
EXPLANATION OF ANSWERS	286
