

Table of Contents

SUBAREA I.

SCIENTIFIC INQUIRY

COMPETENCY 1.0 UNDERSTANDS THE HISTORICAL AND CONTEMPORARY CONTEXTS OF THE STUDY OF PHYSICS AND THE APPLICATIONS OF PHYSICS TO EVERYDAY LIFE

- Skill 1.1 Explain the significance of key individuals and their theories in the history of physics 1
- Skill 1.2 Explain the societal implications of developments in physics5

COMPETENCY 2.0 UNDERSTAND THE NATURE OF SCIENTIFIC INQUIRY, SCIENTIFIC PROCESSES, AND THE ROLE OF OBSERVATION AND EXPERIMENTATION IN SCIENCE

- Skill 2.1 Outline the processes by which new scientific knowledge and hypotheses are generated7
- Skill 2.2 Ethical issues related to scientific processes..... 10
- Skill 2.3 Evaluating the appropriateness of a specified experimental design to test a given hypothesis 11
- Skill 2.4 Recognizing the role of communication among scientists and between scientists and the public in promoting scientific progress 13

COMPETENCY 3.0 UNDERSTAND THE PROCESSES OF GATHERING, ORGANIZING, REPORTING, AND ANALYZING SCIENTIFIC DATA IN THE CONTEXT OF PHYSICS INVESTIGATIONS

- Skill 3.1 Evaluating the appropriateness of a given method or procedure for collecting data 14
- Skill 3.2 Selecting an appropriate and effective graphic representation for organizing and reporting experimental data 15
- Skill 3.3 Applying procedures and criteria for formally reporting experimental procedures and data to the scientific community 17

TEACHER CERTIFICATION STUDY GUIDE

Skill 3.4	Explain relationships between factors as indicated by experimental data	18
-----------	---	----

COMPETENCY 4.0 UNDERSTAND PRINCIPLES AND PROCEDURES OF MEASUREMENT AND THE USE OF MATHEMATICS IN PHYSICS

Skill 4.1	Explain the importance of SI units	22
Skill 4.2	Give examples of typical measuring devices used in physics	25
Skill 4.3	Proper methods of measurement for given situations	26
Skill 4.4	Analyzing uncertainty in measurements	26
Skill 4.5	Apply dimensional analysis and give an example of deriving an equation.....	29
Skill 4.6	Using mathematics to derive and solve equations	30
Skill 4.7	Applying trigonometric functions and graphing to solve problems (including vector problems)	31
Skill 4.8	Using fundamental concepts of calculus to model and solve problems.....	34

COMPETENCY 5.0 UNDERSTAND THE INTERRELATIONSHIPS AMONG PHYSICS, SOCIETY, TECHNOLOGY, AND OTHER SCIENCES AND DISCIPLINES

Skill 5.1	Explore the impact of physics on society	36
Skill 5.2	Compare science and technology	36
Skill 5.3	Understand the technological design process	37
Skill 5.4	Explore some ethical considerations related to science and technology	38
Skill 5.5	Application of scientific and technological decision making at the community, state, national, and international level	39

TEACHER CERTIFICATION STUDY GUIDE

COMPETENCY 6.0 UNDERSTAND SAFE AND PROPER USE OF EQUIPMENT, MATERIALS, AND CHEMICALS USED IN PHYSICS INVESTIGATIONS

Skill 6.1	Explain the principles upon which given laboratory instruments are based.....	40
Skill 6.2	Give examples of some hazards associated with given laboratory materials.....	42
Skill 6.3	Outline some basic safety rules for electricity and electrical equipment.....	44
Skill 6.4	Demonstrate knowledge of proper procedures for dealing with accidents and injuries in the physics laboratory	45

SUBAREA II. MECHANICS AND HEAT ENERGY

COMPETENCY 7.0 UNDERSTAND CONCEPTS RELATED TO MOTION IN ONE AND TWO DIMENSIONS, AND APPLY THIS KNOWLEDGE TO SOLVE PROBLEMS THAT REQUIRE THE USE OF ALGEBRA, CALCULUS, AND GRAPHING

Skill 7.1	Explain and give examples of the terminology, units, and equations used to describe and analyze one and two-dimensional motion ...	46
Skill 7.2	Analyze the movement of freely falling objects near the surface of the earth	48
Skill 7.3	Solve problems involving distance, displacement, speed, velocity, and constant acceleration.....	49
Skill 7.4	Interpret information presented in graphic representations related to displacement, velocity, and constant acceleration.....	51

COMPETENCY 8.0 UNDERSTAND CHARACTERISTICS OF FORCES AND METHODS USED TO MEASURE FORCE, AND SOLVE ALGEBRAIC PROBLEMS INVOLVING FORCES

Skill 8.1	Identify forces acting in a given situation	52
Skill 8.2	Experimental designs for measuring forces.....	54
Skill 8.3	Solve problems with gravitational and frictional forces	56

TEACHER CERTIFICATION STUDY GUIDE

COMPETENCY 9.0	APPLY KNOWLEDGE OF VECTORS AND TRIGONOMETRIC FUNCTIONS TO SOLVE PROBLEMS INVOLVING CONCURRENT, PARALLEL, RESULTANT, EQUILIBRANT, AND COMPONENT FORCES AND TORQUE	
Skill 9.1	Apply graphic solutions to solve problems involving concurrent and equilibrant forces	58
Skill 9.2	Solve problems involving torque.....	59
COMPETENCY 10.0	UNDERSTAND THE LAWS OF MOTION (INCLUDING RELATIVITY) AND CONSERVATION OF MOMENTUM	
Skill 10.1	Explain the characteristics and give examples of each of Newton's laws of motion	61
Skill 10.2	Apply Newton's laws of motion and the conservation of momentum in solving problems.....	63
Skill 10.3	Discuss the implications of special relativity for the laws of motion	66
COMPETENCY 11.0	UNDERSTAND THE CHARACTERISTICS OF CIRCULAR MOTION AND SIMPLE HARMONIC MOTION, AND SOLVE PROBLEMS INVOLVING THESE TYPES OF MOTION	
Skill 11.1	Applying vector analysis to describe uniform circular motion in radians.....	68
Skill 11.2	Determining the magnitude and direction of the force acting on a particle in uniform circular motion	70
Skill 11.3	Analyzing the relationships among displacement, velocity, and acceleration in simple harmonic motion.....	71
Skill 11.4	Solving problems involving springs.....	73
COMPETENCY 12.0	UNDERSTAND KEPLER'S LAWS AND THE LAW OF UNIVERSAL GRAVITATION, AND APPLY THEM TO SATELLITE MOTION	
Skill 12.1	The geometric characteristics of planetary orbits	75

TEACHER CERTIFICATION STUDY GUIDE

Skill 12.2	Apply Kepler's law of equal areas to solve problems involving satellite motion	76
Skill 12.3	Apply Kepler's laws to relate the radius of a planet's orbit to its period of revolution	80
Skill 12.4	Use the law of universal gravitation to interpret the relationship among force, mass, and the distance between masses	80

COMPETENCY 13.0 APPLY THE PRINCIPLE OF CONSERVATION OF ENERGY AND THE CONCEPTS OF ENERGY, WORK, AND POWER

Skill 13.1	Analyze mechanical systems in terms of work, power, and conservation of energy	81
Skill 13.2	Use the concept of conservation of energy to solve problems	84
Skill 13.3	Determine power, mechanical advantage, and efficiency as they relate to work and energy in operations such as simple machines	85

COMPETENCY 14.0 UNDERSTAND THE DYNAMICS OF ROTATIONAL MOTION, INCLUDING TORQUE, ANGULAR MOMENTUM, MOTION WITH CONSTANT ANGULAR ACCELERATION, ROTATIONAL KINETIC ENERGY, CENTER OF MASS, AND MOMENT OF INERTIA

Skill 14.1	Explain the principles of motion with constant angular acceleration	87
Skill 14.2	The law of conservation of angular momentum	90
Skill 14.3	Understand the concepts of center of mass, moment of inertia, and rotational kinetic energy	91

COMPETENCY 15.0 UNDERSTAND THE STATICS AND DYNAMICS OF FLUIDS

Skill 15.1	Applying the concepts of force, pressure, and density	92
Skill 15.2	Use Bernoulli's principle to analyze fluid dynamics	93
Skill 15.3	Apply Archimedes' principle to solve problems involving buoyancy and flotation	96

TEACHER CERTIFICATION STUDY GUIDE

COMPETENCY 16.0 UNDERSTAND THE PRINCIPLES OF THE FIRST AND SECOND LAWS OF THERMODYNAMICS, THE RELATIONSHIP BETWEEN TEMPERATURE AND HEAT, AND THE PRINCIPLES OF THERMAL EXPANSION, THERMAL CONTRACTION, AND HEAT TRANSFER

Skill 16.1	The first and second laws of thermodynamics.....	98
Skill 16.2	Solve calorimetry problems involving heat capacity, specific heat, heat of fusion, and heat of vaporization.....	100
Skill 16.3	Analyze methods of heat transfer.....	103
Skill 16.4	Solve problems involving thermal expansion and thermal contraction of solids.....	106
Skill 16.5	Use the principle of entropy to analyze the operation of heat engines.....	107

COMPETENCY 17.0 UNDERSTAND THE KINETIC-MOLECULAR THEORY AND ITS RELATIONSHIP TO THERMODYNAMICS AND THE CHARACTERISTICS OF SOLIDS, LIQUIDS, AND GASES

Skill 17.1	Analyze the behavior of a gas in terms of the kinetic-molecular theory.....	109
Skill 17.2	Analyze phase changes in terms of kinetic-molecular theory and molecular structure.....	112

SUBAREA III. ELECTRICITY AND MAGNETISM

COMPETENCY 18.0 UNDERSTAND CHARACTERISTICS AND UNITS OF ELECTRIC CHARGE, ELECTRIC FIELDS, ELECTRIC POTENTIAL, AND CAPACITANCE; AND APPLY PRINCIPLES OF STATIC ELECTRICITY TO SOLVE PROBLEMS INVOLVING COULOMB'S LAW AND ELECTRIC FIELD INTENSITY

Skill 18.1	Analyze the behavior of an electroscope in given situations	114
Skill 18.2	Apply Coulomb's law to determine the forces between charges..	116
Skill 18.3	Apply principles of electrostatics to determine electric field intensity	118

TEACHER CERTIFICATION STUDY GUIDE

Skill 18.4 Explore the relationships between capacitance, charge, and potential difference 119

COMPETENCY 19.0 UNDERSTAND CHARACTERISTICS OF ELECTRIC CURRENT AND COMPONENTS OF ELECTRIC CIRCUITS

Skill 19.1 Analyze a DC circuit in terms of conservation of energy and conservation of charge 121

Skill 19.2 Discuss factors that affect resistance 124

Skill 19.3 Give examples of schematic diagrams of circuits 125

Skill 19.4 Apply principles of DC circuits to reduce a complex circuit to a simpler equivalent circuit 125

COMPETENCY 20.0 UNDERSTAND MAGNETS, ELECTROMAGNETS, AND MAGNETIC FIELDS; THE EFFECTS OF MAGNETIC FIELDS ON MOVING ELECTRIC CHARGES; AND THE APPLICATIONS OF ELECTROMAGNETISM

Skill 20.1 Magnets and magnetism 128

Skill 20.2 Determining the orientation and magnitude of a magnetic field... 129

Skill 20.3 Discuss factors that affect the strength of an electromagnet 130

Skill 20.4 Magnitude and direction of the force on a charge or charges moving in a magnetic field 131

Skill 20.5 Discuss the use of electromagnetism in technology 133

COMPETENCY 21.0 UNDERSTAND AND APPLY THE PRINCIPLES OF ELECTROMAGNETIC INDUCTION AND AC CIRCUITS

Skill 21.1 Analyzing factors that affect the magnitude of an induced electromotive force (EMF) 135

Skill 21.2 Applying the appropriate hand rule to determine the direction of an induced current..... 136

Skill 21.3 Analyzing an AC circuit, including relationships involving impedance, reactance, and resonance..... 137

Skill 21.4 Analyzing functions of transformers and generators..... 139

TEACHER CERTIFICATION STUDY GUIDE

COMPETENCY 22.0 UNDERSTAND THE PRINCIPLES OF CONDUCTORS, SEMICONDUCTORS, AND SUPERCONDUCTORS

Skill 22.1	Conductors, semiconductors, and superconductors.....	142
Skill 22.2	Analyze current-voltage characteristics of typical solid state diodes and Zener diodes and explain the function of a diode in a given circuit.....	144
Skill 22.3	Compare NPN and PNP transistors and identify correct terminal connections in a given circuit.....	146
Skill 22.4	Identify the function of a transistor in a given electrical circuit	147

SUBAREA IV. WAVES, SOUND, AND LIGHT

COMPETENCY 23.0 UNDERSTAND WAVES AND WAVE MOTION AND SOLVE PROBLEMS INVOLVING WAVE MOTION

Skill 23.1	Understand waves and wave motion.....	149
Skill 23.2	Applying the wave equation to determine a wave's velocity, wavelength, or frequency	151

COMPETENCY 24.0 APPLY THE PRINCIPLES OF WAVE REFLECTION, REFRACTION, DIFFRACTION, INTERFERENCE, POLARIZATION, DISPERSION, AND THE DOPPLER EFFECT

Skill 24.1	Demonstrate applications of wave reflection, refraction, diffraction, interference, polarization, and dispersion	152
Skill 24.2	Explain use of the Doppler effect.....	154
Skill 24.3	Apply Snell's law to determine index of refraction, angle of incidence, angle of refraction, or critical angle.....	155
Skill 24.4	Solve problems involving diffraction and interference in single and multiple slits.....	157
Skill 24.5	Apply the superposition principle to determine characteristics of a resultant wave	158

TEACHER CERTIFICATION STUDY GUIDE

COMPETENCY 25.0 UNDERSTAND THE CHARACTERISTICS OF SOUND WAVES AND THE MEANS BY WHICH SOUND WAVES ARE PRODUCED AND TRANSMITTED

Skill 25.1	Explain the physical nature of sound waves.....	160
Skill 25.2	Discuss factors that affect the speed of sound in different media	161
Skill 25.3	Solve problems involving resonance, harmonics, and overtones	162

COMPETENCY 26.0 UNDERSTAND THE PRODUCTION, PROPERTIES, AND CHARACTERISTICS OF ELECTROMAGNETIC WAVES

Skill 26.1	The properties of components of the electromagnetic spectrum .	165
Skill 26.2	Give examples of applications of the components of the electromagnetic spectrum	166

COMPETENCY 27.0 UNDERSTAND THE PRINCIPLES OF LENSES AND MIRRORS

Skill 27.1	Comparing types and characteristics of lenses and mirrors	168
Skill 27.2	Using a ray diagram to locate the focal point or point of image formation of a lens or mirror	170
Skill 27.3	Applying the lens and mirror equations to analyze problems involving lenses and mirrors	173
Skill 27.4	Give examples of applications of lenses and mirrors.....	176

SUBAREA V. QUANTUM THEORY AND THE ATOM

COMPETENCY 28.0 UNDERSTAND THE PRINCIPLES AND CONCEPTS OF THE PHOTOELECTRIC EFFECT, QUANTUM THEORY, AND THE DUAL NATURE OF LIGHT AND MATTER

Skill 28.1	Apply the laws of photoelectric emission to explain photoelectric phenomena	179
Skill 28.2	Analyze line spectra in terms of electron transitions.....	181

TEACHER CERTIFICATION STUDY GUIDE

Skill 28.3 Applying the principles of stimulated emission of radiation to lasers and masers..... 184

Skill 28.4 Analyzing evidence supporting the dual nature of light and matter 186

COMPETENCY 29.0 UNDERSTAND PHYSICAL MODELS OF ATOMIC STRUCTURE AND THE NATURE OF ELEMENTARY PARTICLES

Skill 29.1 Discuss historic and contemporary models of atomic structure ... 188

Skill 29.2 Demonstrate understanding of notation used to represent elements, molecules, ions, and isotopes 189

Skill 29.3 Discuss the relationship between the design of particle accelerators and elementary particle characteristics 190

COMPETENCY 30.0 UNDERSTAND THE PRINCIPLES OF RADIOACTIVITY AND TYPES AND CHARACTERISTICS OF RADIATION, AND THE PROCESS OF RADIOACTIVE DECAY

Skill 30.1 Apply principles of the conservation of mass-energy and charge to balance equations for nuclear reactions 192

Skill 30.2 Analyze radioactive decay in terms of half-life..... 194

Skill 30.3 Analyze the nuclear disintegration series for a given isotope 195

Skill 30.4 Basic operation of types of radiation detectors 197

TEACHER CERTIFICATION STUDY GUIDE

COMPETENCY 31.0 UNDERSTAND TYPES AND CHARACTERISTICS OF NUCLEAR REACTIONS, METHODS OF INITIATING AND CONTROLLING THEM, AND APPLICATIONS OF NUCLEAR REACTIONS TO THE GENERATION OF ELECTRICITY

Skill 31.1	Explain characteristics of fission and fusion	199
Skill 31.2	The operation of components of a nuclear reactor	200
Skill 31.3	Calculate nuclear mass defect and binding energy	201
Skill 31.4	Give examples of the isotopes commonly used to fuel nuclear reactors and the problems associated with the waste products generated by nuclear reactions.	203
Sample Test		204
Answer Key		227
Rigor Analysis Table		228
Rationales with Sample Questions		229
