

**Table of Contents**

<b>SUBAREA I.</b>	<b>SCIENTIFIC INQUIRY</b>
<b>COMPETENCY 1.0</b>	<b>UNDERSTAND THE PRINCIPLES AND PROCEDURES OF SCIENTIFIC INQUIRY..... 1</b>
Skill 1.1	Formulating research questions and investigations in physics ..... 1
Skill 1.2	Developing valid experimental designs for collecting and analyzing data and testing hypotheses..... 1
Skill 1.3	Recognizing the need for controlled experiments.....2
Skill 1.4	Understanding procedures for collecting and interpreting data to maintain objectivity ..... 3
Skill 1.5	Recognizing independent and dependent variables and analyzing the role of each in experimental design ..... 4
Skill 1.6	Identifying an appropriate method for presenting data for a given purpose ..... 4
Skill 1.7	Applying mathematics to investigations in physics and the analysis of data ..... 5
Skill 1.8	Interpreting results presented in different formats ..... 9
Skill 1.9	Evaluating the validity of conclusions ..... 10
Skill 1.10	Assessing the reliability of sources of information ..... 11
<b>COMPETENCY 2.0</b>	<b>APPLY KNOWLEDGE OF METHODS AND EQUIPMENT USED IN SCIENTIFIC INVESTIGATIONS. .... 13</b>
Skill 2.1	Includes selecting and using appropriate measurement devices and methods for collecting data..... 13
Skill 2.2	Evaluating the accuracy and precision of measurement and methods collecting data..... 13
Skill 2.3	Identifying procedures and sources of information related to the safe use, storage, and disposal of materials and equipment related to physics investigations measurement..... 15

## TEACHER CERTIFICATION STUDY GUIDE

---

Skill 2.4	Identifying hazards associated with laboratory practices and materials.....	16
Skill 2.5	Applying procedures for preventing accidents and dealing with emergencies.....	18
<b>COMPETENCY 3.0</b>	<b>UNDERSTAND THE DEVELOPMENT OF SCIENTIFIC THOUGHT AND INQUIRY .....</b>	<b>20</b>
Skill 3.1	Includes demonstrating knowledge of the reliance of scientific investigations on empirical data, verifiable evidence, and logical reasoning.....	20
Skill 3.2	Recognizing the effect of researcher bias on scientific investigations and the interpretation of data .....	21
Skill 3.3	Demonstrating an awareness of the contributions made to physics by individuals of diverse backgrounds and from different time periods.....	21
Skill 3.4	Recognizing the dynamic nature of scientific knowledge, including ways in which scientific knowledge changes .....	22
<b>COMPETENCY 4.0</b>	<b>UNDERSTAND THE RELATIONSHIPS OF PHYSICS TO TECHNOLOGICAL AND SOCIETAL ISSUES, BOTH CONTEMPORARY AND HISTORICAL.....</b>	<b>24</b>
Skill 4.1	Includes recognizing the relationships between science and technology .....	24
Skill 4.2	Analyzing political and social factors that influence developments in physics, including current issues and controversies related to physics research and technology .....	25
Skill 4.3	Evaluating the credibility of scientific claims made various forums....	26
<b>COMPETENCY 5.0</b>	<b>UNDERSTAND INTERRELATIONSHIPS AMONG THE PHYSICAL, LIFE, AND EARTH/SPACE SCIENCES.....</b>	<b>27</b>
Skill 5.1	Includes recognizing major unifying themes and concepts that are common to the various scientific disciplines .....	27
Skill 5.2	Describing the integration and interdependence of the sciences .....	28
Skill 5.3	Interdisciplinary connections among the sciences and their applications in real-world contexts.....	29

# TEACHER CERTIFICATION STUDY GUIDE

---

## SUBAREA II.

## MECHANICS

### COMPETENCY 6.0 ANALYZE MOTION IN ONE AND TWO DIMENSIONS ... 30

Skill 6.1	Analyzing information related to displacement, speed, velocity, and acceleration presented in one or more representations.....	30
Skill 6.2	Solving problems involving constant acceleration .....	33
Skill 6.3	Applying principles of trigonometry and properties of vectors to analyze motion in two dimensions.....	34
Skill 6.4	Applying calculus to analyze motion in one dimension.....	39

### COMPETENCY 7.0 UNDERSTAND NEWTON'S LAWS OF MOTION AND THE LAW OF UNIVERSAL GRAVITATION..... 43

Skill 7.1	Applying Newton's laws of motion, both descriptively and mathematically, in a variety of situations .....	43
Skill 7.2	Solving a variety of problems involving different types of forces in one and two dimensions.....	45
Skill 7.3	Analyzing the vector nature of force .....	49
Skill 7.4	Determining methods for measuring force and differentiating between mass and weight.....	50
Skill 7.5	Applying the law of universal gravitation and Kepler's laws in a variety of situations.....	52

### COMPETENCY 8.0 UNDERSTAND CONSERVATION OF ENERGY AND CONSERVATION OF MOMENTUM ..... 55

Skill 8.1	Includes applying the concepts of work, energy, and power in a variety of situations.....	55
Skill 8.2	Analyzing the kinetic and potential energy of various systems.....	57
Skill 8.3	Applying the principles of conservation of energy and conservation of linear momentum to situations, including elastic and inelastic collisions.....	59

## TEACHER CERTIFICATION STUDY GUIDE

---

### **COMPETENCY 9.0 UNDERSTAND TORQUE, STATIC EQUILIBRIUM, AND ROTATIONAL DYNAMICS..... 62**

Skill 9.1	Analyzing the forces and torques acting in a given situation .....	62
Skill 9.2	Applying the concepts of force, torque, and energy to analyze the operation of simple devices .....	64
Skill 9.3	Applying the conservation of angular momentum.....	65
Skill 9.4	Analyzing the motion of a rigid body in terms of moment of inertia, rotational kinetic energy, and angular momentum.....	66

### **COMPETENCY 10.0 UNDERSTAND THE CHARACTERISTICS OF OSCILLATORY MOTION ..... 67**

Skill 10.1	Analyzing models of simple harmonic motion.....	67
Skill 10.2	Recognizing the relationship between the simple harmonic oscillator and uniform circular motion .....	69
Skill 10.3	Applying the law of conservation of energy to oscillating systems ....	70
Skill 10.4	Recognizing the effects of damping.....	71

---

### SUBAREA III.

### ELECTRICITY AND MAGNETISM

<b>COMPETENCY 11.0</b>	<b>UNDERSTAND ELECTRIC CHARGE, ELECTRIC FIELDS, AND ELECTRIC POTENTIAL.....</b>	<b>72</b>
Skill 11.1	Includes describing the nature of charge.....	72
Skill 11.2	Describing static charges in conductors and insulators.....	74
Skill 11.3	Applying Coulomb's law to determine forces and fields due to various charge distributions.....	75
Skill 11.4	Applying the concepts of electrostatic potential energy, potential, and capacitance .....	78
<b>COMPETENCY 12.0</b>	<b>UNDERSTAND SIMPLE CIRCUITS .....</b>	<b>82</b>
Skill 12.1	Includes describing the properties of conductors, insulators, semiconductors, and Superconductors .....	82
Skill 12.2	Applying Ohm's and Kirchhoff's laws to the analysis of series and parallel circuits.....	84
Skill 12.3	Properly using voltmeters and ammeters .....	87
Skill 12.4	Determining power dissipated by circuit elements.....	88
Skill 12.5	Analyzing energy transfer and conservation in electrical circuits.....	88
<b>COMPETENCY 13.0</b>	<b>UNDERSTAND MAGNETIC FIELDS .....</b>	<b>89</b>
Skill 13.1	Includes describing the properties of permanent magnets .....	89
Skill 13.2	Applying laws to determine the orientation and strength of a magnetic field .....	90
Skill 13.3	Determining the effect of a magnetic field on moving charges .....	92
Skill 13.4	Explaining the role of magnetic force and torque in the operation of technological devices .....	93

## TEACHER CERTIFICATION STUDY GUIDE

---

### **COMPETENCY 14.0 UNDERSTAND ELECTROMAGNETIC INDUCTION ..... 95**

Skill 14.1	Includes finding the rate of change of magnetic flux through a surface.....	95
Skill 14.2	Analyzing factors that affect the magnitude of an induced emf .....	95
Skill 14.3	Determining the direction of an induced current or emf.....	96
Skill 14.4	Recognizing that magnetic energy is stored in an inductor .....	98
Skill 14.5	Describing alternators and the basic properties of alternating current .....	98
Skill 14.6	Using the principle of electromagnetic induction to explain the operation of technological devices .....	100

### **SUBAREA IV. WAVES, ACOUSTICS, AND OPTICS**

#### **COMPETENCY 15.0 UNDERSTAND THE CHARACTERISTICS OF WAVES AND WAVE MOTION..... 102**

Skill 15.1	Includes describing the transfer of momentum and energy by wave motion.....	102
Skill 15.2	Comparing longitudinal and transverse waves .....	103
Skill 15.3	Analyzing and relating the characteristics of waves .....	104
Skill 15.4	Explaining reflection, refraction, diffraction, and the Doppler effect...	104
Skill 15.5	Applying the principle of superposition to investigate the properties of constructive and destructive interference .....	106

#### **COMPETENCY 16.0 UNDERSTAND THE PRINCIPLES OF SOUND AND ACOUSTICS ..... 107**

Skill 16.1	Includes explaining the production and propagation of sound waves .....	107
Skill 16.2	Applying the principles of standing waves to explain resonance and to analyze the production of musical sounds in vibrating strings and air columns .....	107
Skill 16.3	Analyzing the relationship between sound and human perception of sound.....	110

## TEACHER CERTIFICATION STUDY GUIDE

---

Skill 16.4	Describing and applying the Doppler effect.....	110
<b>COMPETENCY 17.0 UNDERSTAND ELECTROMAGNETIC WAVES AND THE ELECTROMAGNETIC SPECTRUM.....</b>		<b>112</b>
Skill 17.1	Includes identifying the connection between Maxwell's equations and the generation and propagation of electromagnetic waves .....	112
Skill 17.2	Demonstrating knowledge of radiometry and photometry .....	113
Skill 17.3	Describing the electromagnetic spectrum in terms of wavelength, frequency, and energy.....	114
Skill 17.4	Describing how the wave theory of light is applied to a variety of phenomena .....	115
Skill 17.5	Analyzing applications of double-slit interference, diffraction gratings, and interferometers.....	116
<b>COMPETENCY 18.0 UNDERSTAND RAY OPTICS .....</b>		<b>117</b>
Skill 18.1	Includes applying the laws of reflection, total internal reflection, and refraction .....	117
Skill 18.2	Using ray diagrams with lenses and mirrors.....	118
Skill 18.3	Applying the thin lens and spherical mirror equations .....	122
Skill 18.4	Explaining the operation of optical instruments .....	125
Skill 18.5	Describing the effect of limit resolution.....	127

---

---

**TEACHER CERTIFICATION STUDY GUIDE**

---

---

**SUBAREA V. NATURE OF MATTER, THERMODYNAMICS,  
AND MODERN PHYSICS**

---

---

**COMPETENCY 19.0 UNDERSTAND THE PARTICULATE NATURE OF  
MATTER ..... 129**

Skill 19.1	Includes recognizing basic characteristics of the states of matter .....	129
Skill 19.2	Describing how the Maxwell-Boltzmann theory applies to an ideal gas.....	132
Skill 19.3	Analyzing phase changes.....	135
Skill 19.4	Describing the properties of materials at low temperatures.....	137

**COMPETENCY 20.0 UNDERSTAND THE LAWS OF THERMODYNAMICS .... 139**

Skill 20.1	Includes differentiating between temperature, internal energy, and heat .....	139
Skill 20.2	Calculating heat loss or gain using specific heat .....	139
Skill 20.3	Identifying processes of thermal energy transfer .....	140
Skill 20.4	Applying the principles of enthalpy, internal energy, and thermodynamic work .....	141
Skill 20.5	Applying the law of conservation of energy .....	142
Skill 20.6	Analyzing the relationship between entropy and the availability of energy to perform work.....	143

## TEACHER CERTIFICATION STUDY GUIDE

---

<b>COMPETENCY 21.0 UNDERSTAND THE BASIC IDEAS OF QUANTUM MECHANICS AND RELATIVITY .....</b>	<b>145</b>
Skill 21.1 Includes explaining blackbody radiation and the photoelectric effect.....	145
Skill 21.2 Describing evidence of the dual nature of light and matter.....	147
Skill 21.3 Demonstrating a basic understanding of wave functions and the Schrödinger equation .....	148
Skill 21.4 Recognizing models of atomic structure and their relationship to spectroscopy .....	148
Skill 21.5 Describing the operation of lasers .....	152
Skill 21.6 Demonstrating a basic understanding of the theory of special relativity .....	154
<b>COMPETENCY 22.0 UNDERSTAND THE BASIC IDEAS OF NUCLEAR PHYSICS.....</b>	<b>156</b>
Skill 22.1 Recognizing models of the nucleus.....	156
Skill 22.2 Describing properties of nuclei and their applications.....	157
Skill 22.3 Relating nuclear structure and forces to radioactivity .....	158
Skill 22.4 Solving problems involving half-life.....	160
Skill 22.5 Differentiating between fission and fusion reactions and their applications .....	161
Skill 22.6 Calculating energy transformations in nuclear reactions .....	164
Skill 22.7 Demonstrating a basic understanding of the properties of quarks and the standard model of elementary particle physics.....	165
<b>Sample Test.....</b>	<b>167</b>
<b>Answer Key .....</b>	<b>182</b>
<b>Rationales with Sample Questions .....</b>	<b>183</b>
